Safe Slide
NACOM

Specialty Coatings and Maintenance Services.

NACOM is a unique Safe Slide measurable that combines multiple certifications into one score to identify the overall expertise of an individual or team.

Terms & Conditions

***Fiberglass repair is defined as any damage that is an obvious threat to the guests, (i.e. a chip or gouge with a sharp edge). This is not to be confused with cosmetic repair, (i.e. a spider crack with no flaking or raised edge). This does not include any major repairs that require fiberglass cloth and resin lamination.**

**** Because of the restrictions of our caulk being able to adhere to joints without the proper amount of surface area, we require that the seams are 3/16" wide to caulk them (If seams are too tight, the caulk will not adhere properly).**

Customer Expectations

Safe Slide Restoration reserves the right to have adequate access to the project area in order to complete the project as efficiently as Safe Slide Restoration deems necessary. This may require, but is not limited to: working 12 hours per day and seven days per week. The facility is responsible for providing access to an adequate water source (5 gallons per minute), electrical power (multiple circuits will be needed), and restroom facilities for the duration of the job. In the event that the project involves any chip repairs or gel coat application, Safe Slide's technicians are capable of in-field color matching the existing Gel Coat. (This is not to be confused with the manufacturer's exact color matching). Our customers have the right to request a draw down, but requests must be made 28 days before the Safe Slide crew arrives on-site. Recaulking seams does not apply if the seam has been previously permanently fiberglassed. We strive towards the very best finish that can be achieved; however, some pinholes may be present. This Agreement shall be construed and governed by the laws of the State of Missouri. The parties agree that in the event any action is brought to enforce any terms of this Agreement or for damages for breach of the Agreement, the venue for such cause of action shall be Madison County, Missouri Circuit Court.

Customer Responsibilities

Safe Slide will provide draw down color options if requested 28 days prior to project start date. In the event that leaking seams are being addressed by Safe Slide Restoration, the customer is responsible for identifying and labeling seams on the interior and exterior of the slide (we recommend using a permanent marker in the ride path to label seams). The customer is responsible for identifying areas where lift is unable to operate. If a lift is required, Safe Slide is not responsible for any broken concrete, landscaping, etc. Safe Slide may require the removal of fencing to allow lift access to the water slide area if there isn't access through a gate opening. The customer is responsible for providing waste removal. The customer is required to provide access to restrooms to the Safe Slide crew for the duration of the project. A walk through of finished work and subsequent sign-off is required before Safe Slide's crew leaves the job site. Missing the post project walk through is equivalent to an approved sign off by the customer. Safe Slide Restoration will not be responsible for unscheduled return work in the case that the customer misses scheduled post project walk-through and subsequent sign-off. We recommend 20 test rides on your slide(s), with different body sizes and builds, if possible, before the season begins. We highly recommend daily dry inspections and a single test ride before daily operation.

Possible Additional Charges

If there are any previous interior or exterior coatings not specified in the above work scope, there will be an additional charge for interior or exterior failed coatings. The pricing above does not include the cost of state taxes, licenses, or permits if required. Slides may require a second coat of paint to achieve the desired finish. In the event that a second coat of paint is required, there will be an additional charge of 50% of the original paint price. A 2-3-point Tie-off system on top portion of closed flume slide may be needed if a lift is inaccessible. A cost of \$90 per panel will be assessed and tie offs will stay in place for customer use. An additional daily fee may be assessed if the project site is compromised due to negligence of customer or persons under the customer's control of said project site. If the customer does not show up and needs to postpone the post job walk through, there will be an additional charge for the delay. This will be determined by how long Safe Slide must stay on site in order to get the walk-through and sign-off which is required before our staff leaves the site. **The cost of a lift and/or scaffolding is not included in the above pricing.** If a lift and/or scaffolding is required, it will be the responsibility of the park to provide. **Due to the effects of rising materials and transportation costs, all prices are subject to change in accordance with these increases. We will continue our commitment to use quality products with your project, as always. Our team is working diligently to secure fair pricing in an ever-evolving market to curb any potential price increases. Thank you in advance for your continued partnership.**

Warranty Information

5 – year paint Workmanship warranty:

Our 5 – year workmanship warranty covers any delamination that occurs of the coating applied. This warranty **does not** cover fading, claims from extreme acts of nature, improper washing procedures, vandalism, improper maintenance with application of aggressive chemicals. This warranty may become void if peeling occurs due to poor adhesion from the previous original or recoated substrate occurs.
