PLANNING COMMISSION
MEETING AGENDA
REGULAR MEETING

David Lambert, Chairman, Marianna Perakis, Vice Chairman
Toby Buechner, Carlton Faison, Michael W. Hutson, Tom Krent,
Lakshmi Malalahalli, Sadek Rahman and John J. Tagle

September 13, 2022 **7:00 P.M.** **Council Chambers**

1. ROLL CALL

2. APPROVAL OF AGENDA

3. APPROVAL OF MINUTES – August 23, 2022

4. PUBLIC COMMENT – For Items Not on the Agenda

OTHER ITEMS

5. PUBLIC HEARING – PLANNED UNIT DEVELOPMENT (File Number PUD 019 JPLN2022-0013) – Proposed Village of Troy PUD, South side of Long Lake, West of Rochester (Parcels 88-20-15-201-046 & 88-20-15-201-033), Section 15, Currently Zoned RT (One Family Attached Residential), R-1C (One Family Residential) and CB (Community Business) District.

6. PUBLIC COMMENT – For Items on the Agenda

7. ADJOURN

.

NOTICE:*People with disabilities needing accommodations for effective participation in this meeting should contact the City Clerk by e-mail at clerk@troymi.gov or by calling (248) 524-3317 at least two working days in advance of the meeting. An attempt will be made to make reasonable accommodations*

Televised Live, Government Channel WTRY (10 WideOpenWest and 17 Comcast) Replayed Wednesdays 3:00 pm, 6:00 pm and 11:00 pm

Chair Lambert called the Regular meeting of the Troy City Planning Commission to order at 7:00 p.m. on August 23, 2022, in the Council Chamber of the Troy City Hall. Chair Lambert and Vice Chair Perakis presented opening remarks relative to the role of the Planning Commission and procedure of tonight's meeting.

1. ROLL CALL

Present:
Carlton M. Faison
Michael W. Hutson
Tom Krent
David Lambert
Lakshmi Malalahalli
Marianna Perakis
John J. Tagle

Absent:
Toby Buechner
Sadek Rahman

Also Present:
R. Brent Savidant, Community Development Director
Ben Carlisle, Carlisle Wortman Associates
Julie Quinlan Dufrane, Assistant City Attorney
Kathy L. Czarnecki, Recording Secretary

2. APPROVAL OF AGENDA

Resolution # PC-2022-08-046
Moved by: Krent
Support by: Tagle

RESOLVED, To approve the Agenda as prepared.

Yes: All present (7)
Absent: Buechner, Rahman

MOTION CARRIED

3. APPROVAL OF MINUTES – August 9, 2022

Resolution # PC-2022-08-047
Moved by: Malalahalli
Support by: Perakis

RESOLVED, To approve the minutes of the August 9, 2022 Regular meeting as submitted.

Yes: All present (7)
Absent: Buechner, Rahman

MOTION CARRIED

4. PUBLIC COMMENT – For Items Not on the Agenda

There was no one present who wished to speak.

OTHER ITEMS

5. STUDY ITEM – POTENTIAL REZONING AND PRELIMINARY SITE PLAN – Elevate Mixed Use Development, Southeast Corner of Big Beaver and Todd (1985 W. Big Beaver, 1936 Butterfield, 1787 W. Big Beaver and PIN 88-20-29-226-020), Section 29, Currently Zoned BB (Big Beaver), P (Parking) and R-1C (One Family Residential) Zoning Districts

Mr. Carlisle presented background information on a potential Rezoning and Preliminary Site Plan for Elevate Mixed Use Development. He addressed the proposed combination of five parcels to construct a new five-story mixed use building that wraps around an existing building. The application proposes a 7,000 square foot restaurant, a 70-unit apartment building and a drop off circle with valet service located between the restaurant and apartment building. Mr. Carlisle addressed parking, the applicant's request for relief of 54 parking spaces, access points, amenities and an existing office parcel under separate ownership that is not part of the application. He reported the applicant has not indicated which zoning district would be sought for the rezoning.

Mr. Carlisle reported the application presented this evening is a conceptual plan only and no action would be taken.

Mr. Carlisle asked the Planning Commission to consider the following:
- Is the plan consistent with the City Master Plan?
- Does the Planning Commission support the proposed mix of uses and housing types? Are there additional types or changes in types that the Planning Commission thinks should be considered?
- Is there concern about the future of the remaining parcel zoned Office that is not part of the application?
- Are there site plan changes that the applicant should consider?
- Are there other onsite amenities that the applicant should include?
- Are there other considerations that should be discussed with the applicant?

Discussion among administration and Planning Commission:
- Potential partnership with office building not included in rezoning application.
- Parking; location, residential/restaurant uses, covered/uncovered, shared, valet/self-parking.
- Parking study required and parking requirements must be met with application submittal.

Mr. Savidant introduced property owner Jason Hamama of Encore Development and the architectural team, Peter Stuhlreyer and Mike Pizzola of Designhaus.

Some comments during discussion related to:
- Relationship of apartment building to restaurant.
- Consideration to locate apartment building further south.
- Zoning districts that applicant might seek to rezone parcels; Big Beaver (BB) or Planned Unit Development (PUD).
- Straight rezoning request versus conditional rezoning request.
- Parking; shared, valet, self-parking, consideration of additional parking level if needed.
- Potential use of parcel under separate ownership should it be acquired; encourage partnership of exempt parcel in rezoning application.
- Five (5) foot sidewalk would be provided to accommodate pedestrian traffic.
- Banquet room and co-workspace are for use by apartment residents only.

Mr. Savidant summarized Planning Commission comments:
- Support rezoning to the Big Beaver zoning district.
- Come back with a workable parking design.
- Consider pulling residential further to the south.
- Encourage owner of parcel exempt from conceptual plan to participate in rezoning process.

6. PLANNING COMMISSION SCHEDULE – Resolution to Cancel October 11, 2022 Regular Meeting

Mr. Savidant said attendance by Planning Commission members and staff at the Annual Michigan Association Planning Conference in Mackinaw Island this October compromises attendance at the October 11, 2022 Regular Planning Commission meeting.

After a brief discussion, it was the consensus of the Planning Commission to cancel the October 11, 2022 regularly scheduled meeting.

Resolution # PC-2022-08-048
Moved by: Krent
Support by: Malalahalli

RESOLVED, To cancel the Planning Commission Regular meeting scheduled for October 11, 2022.

Yes: All present (7)
Absent: Buechner, Rahman

MOTION CARRIED

7. PUBLIC COMMENT – For Items on the Agenda

There was no one present who wished to speak.

Chair Lambert opened the floor to Planning Commission comment. There were no Planning Commission comments.

8. ADJOURN

The Regular meeting of the Planning Commission adjourned at 7:40 p.m.

Respectfully submitted,

_____

David Lambert, Chair

_____

Kathy L. Czarnecki, Recording Secretary

DATE: September 8, 2022

TO: Planning Commission

FROM: R. Brent Savidant, Community Development Director

SUBJECT: PUBLIC HEARING – PLANNED UNIT DEVELOPMENT (File Number PUD 019 JPLN2022-0013) – Proposed Village of Troy PUD, South side of Long Lake, West of Rochester (Parcels 88-20-15-201-046 & 88-20-15-201-033), Section 15, Currently Zoned RT (One Family Attached Residential), R-1C (One Family Residential) and CB (Community Business) District.

The applicant Robertson Brothers Homes seeks Conceptual Development Plan (CDP) and Preliminary Development Plan (PDP) approval for the Village of Troy Planned Unit Development (PUD). The project features 20 detached single-family homes, 56 attached single-family homes (2 stories) and 70 attached townhomes (3 stories).

The Planning Commission is a recommending body for this application.

The attached report prepared by Carlisle/Wortman Associates, Inc. (CWA), the City's Planning Consultant, summarizes the project as revised. CWA prepared the report with input from various City departments including Planning, Engineering, Public Works and Fire. City Management supports the findings of fact contained in the report and the recommendations included therein.

PUBLIC HEARING – PLANNED UNIT DEVELOPMENT (File Number PUD 019 JPLN2022-0013) – Proposed Village of Troy PUD, South side of Long Lake, West of Rochester (Parcels 88-20-15-201-046 & 88-20-15-201-033), Section 15, Currently Zoned RT (One Family Attached Residential), R-1C (One Family Residential) and CB (Community Business) District.

Resolution # PC-2022-09-

Moved by:
Seconded by

WHEREAS, The applicant Robertson Brothers Homes seeks Conceptual Development Plan (CDP) and Preliminary Development Plan (PDP) approval for the Village of Troy Planned Unit Development (PUD), located on the south side of Long Lake, west of Rochester, in Section 15, approximately 20.48 acres in area; and

WHEREAS, The Village of Troy PUD features 20 detached single-family homes, 56 attached single-family homes (2 stories) and 70 attached townhomes (3 stories); and

WHEREAS, The PUD provides a walkable urban environment that is compact, designed to human scale, and exhibits contextual integration of buildings and city spaces, and

WHEREAS, The PUD provides a compatible mix of open space, landscaped areas and pedestrian amenities, including incorporation of a regional trailway system; and

WHEREAS, The PUD proposes appropriate land use transitions between the PUD and surrounding properties, and

WHEREAS, The PUD will reasonably mitigate impacts to the transportation system and enhance non-motorized facilities and amenities.

WHEREAS, The PUD provides a complementary variety of housing types; and

BE IT RESOLVED, That the Planning Commission recommends to City Council that Concept Development Plan Approval and Preliminary Development Plan Approval for the proposed Village of Troy, be granted.

PUD and Preliminary Development Plan Approval Review For City of Troy, Michigan

Applicant: Robertson Homes

Project Name: Village of Troy PUD

Plan Date: March 2022

Location: West of southwest corner of Long Lake Road and Rochester Road

Zoning: RT, R-1C, and CB

Action Requested: PUD and Preliminary Development Plan Approval

SITE DESCRIPTION

The subject site is located on the west side of the southwest corner of Long Lake Road and Rochester Road. The site is approximately 20.48 acres in area and is proposed for mixed housing type development. The applicant is proposing 146 new for-sale units. Breakout of the units include:

- 20 detached single-family homes
- 56 attached single-family homes (2 stories)
- 70 attached townhomes (3 stories)

Access is via E Long Lake Road and Rochester Road. Most of the property (approximately 15 acres) is zoned RT (residential transitional), with the remaining areas zoned R1-C (one family residential) and C-B (community business).

The applicant is seeking Planned Unit Development approval in order to allow for townhomes on currently zoned CB, Commercial Business district, and for dimensional relief. More details of dimensional relief are noted below.

Site Location:

Proposed Uses of Subject Parcel:
One hundred and forty-six (146) single-family detached homes, attached homes, and townhomes.

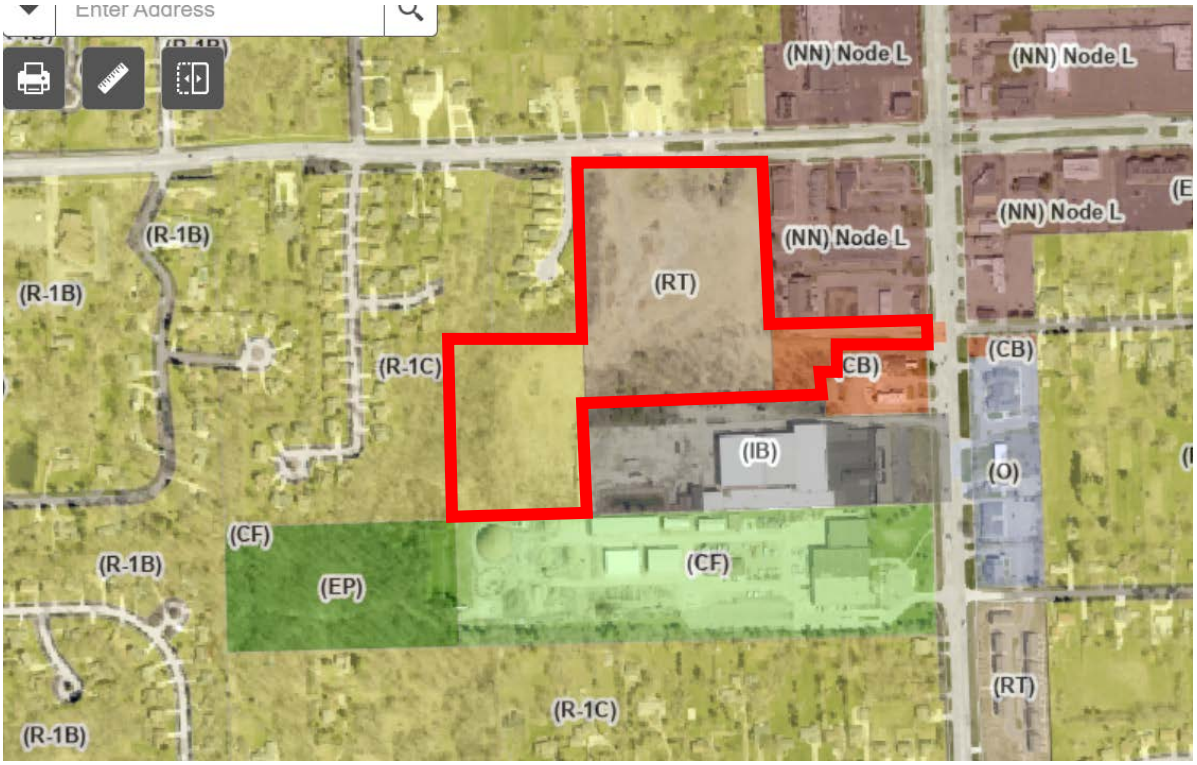
Current Use of Subject Property:
Vacant

Current Zoning:
The property is currently zoned RT (residential transitional), R1-C (one family residential), and C-B (community business).

Surrounding Property Details:

Direction	Zoning	Use
North	NN, Neighborhood Node and R1-C, Single Family	Commercial and Residential
South	IB, Industrial and Business, CB, Community Business, and CF, Community Facility	Commercial, Industrial, and DPW Yard
East	NN, Neighborhood Node	Commercial
West	R1-C, Single Family	Single Family Residential

ZONING



The site includes a mix of zoned RT (residential transitional), R1-C (one family residential) and C-B (community business) zoning.

HOUSING DETAILS

The applicant is offering the following housing types:

Detached single-family homes

- 20 Units
- 2 options
    - One-story ranches at 1,850 square feet; or
    - Two-story homes ranging from 1,900 to 3,100 square feet in size

Attached single-family homes (2 stories)

- 56 units
- 1,600 square feet that provides for the option of 2 or 3-bedrooms and includes an attached two car garage.

Attached townhomes (3 stories)

- 70 units
- The entry price point will consist of attached townhomes ranging between 1,200 and 1,350 square feet with private attached single car garages.

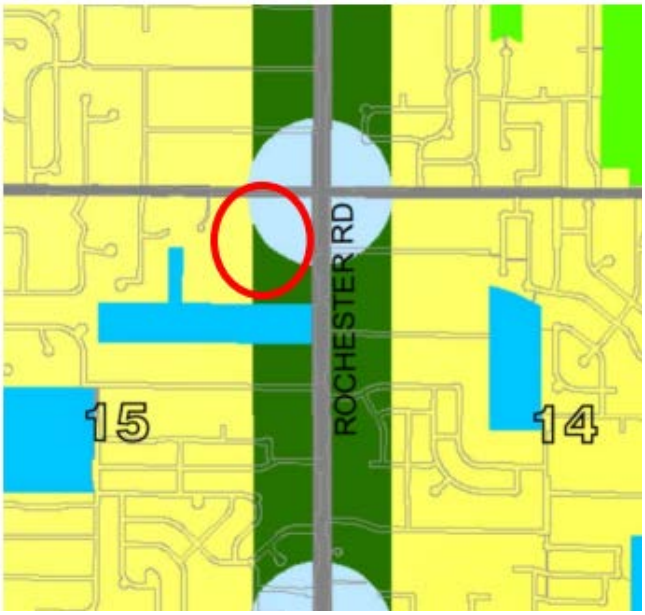
Conceptually, it is not clear the distinction between attached townhomes and attached single family homes. The Planning Commission noted a desire to consider alternative housing options than townhomes.

Items to be addressed: *1). Describe difference/distinction from attached townships and attached single-family homes; and 2). Describe if alternatives to townhomes were considered.*

MASTER PLAN

The site is designated as a future land use of single family residential, Rochester Road, and partially neighborhood node.

The Planning Commission has spent a lot of time discussing both the neighborhood node concept and the proposed improvements and future development patterns within and adjacent to the nodes.



PUD PROCESS

A Planned Unit Development project is viewed as an integrated development concept. To that end, the provisions of this Article are not intended to be used as a device for avoiding the zoning requirements that would otherwise apply, but rather to allow flexibility and mixture of uses, and to improve the design, character and quality of new development. The use of a Planned Unit Development to permit variations from other requirements of this Ordinance shall only be approved when such approval results in improvements to the public health, safety and welfare in the area affected, and in accordance with the intent of this Article.

The approval of a Planned Unit Development (PUD) is a three-step process:

> ***Step 1-Concept Plan:*** *The first step shall be application for and approval of a Concept Development Plan, which requires a legislative enactment amending the zoning district map so as to reclassify the property as a Planned Unit Development. A proposed Development Agreement shall be included and incorporated with the Concept Development Plan, to be agreed upon and approved coincident with said Plan. The Concept Development Plan and Development Agreement shall be approved by the City Council following the recommendation of the Planning Commission. Such action, if and when approved, shall confer upon the applicant approval of the Concept Development Plan and shall rezone the property to PUD in accordance with the terms and conditions of the Concept Development Plan approval.*

> ***Step 2- Preliminary Development Plan Approval:*** *The second step of the review and approval process shall be the application for and approval of a Preliminary Development Plan (preliminary site plan) for the entire project, or for any one or more phases of the project. City Council shall have the final authority to approve and grant Preliminary Development Plan approvals, following a recommendation by the Planning Commission.*

> ***Step 3- Final Development Plan Approval:*** *The third step of the review and approval process shall be the review and approval of a Final Development Plan (final site plan) for the entire project, or for any one or more phases of the project, and the issuance of building permits. Final Development Plans for Planned Unit Developments shall be submitted to the Zoning Administrator for administrative review, and the Zoning Administrator, with the recommendation of other appropriate City Departments, shall have final authority for approval of such Final Development Plans.*

The applicant is seeking a recommendation of approval for their Preliminary Development Plan.

PUD INTENT

As set forth in Section 11.01, the intent of the Planned Unit Development option is to permit flexibility in the design and use of residential and non-residential land which, through the implementation of an overall development plan, when applicable to the site, will:

1. Encourage developments that will result in a long-term contribution to social, environmental and economic sustainability in the City of Troy.
2. Permit development patterns that respond to changing public and private needs.
3. Encourage flexibility in design and use that will result in a higher quality of development and a better overall project than would be accomplished under conventional zoning, and which can be accommodated without sacrificing established community values.
4. Provide for the long-term protection and/or preservation of natural resources, natural features, and/or historic and cultural resources.
5. Promote the efficient use and conservation of energy.
6. Encourage the use, redevelopment and improvement of existing sites where current ordinances do not provide adequate protection and safeguards for the site or its surrounding areas, or where current ordinances do not provide the flexibility to consider redevelopment, replacement, or adaptive re-use of existing structures and sites.
7. Provide for enhanced housing, employment, recreation, and shopping opportunities for the citizens of Troy.
8. Ensure the compatibility of design and use between various components within the PUD and with neighboring properties and uses. 9. Ensure development that is consistent with the intent of the Master Plan.

PREVIOUS PLANNING COMMISSION REVIEW

The Planning Commission discussed the project at the January 11, 2022 meeting. There was lengthy discussion of the following:

- Public amenity; safety, liability, maintenance of sledding hill.
- Consideration to an alternate amenity, possibly all-season use.
- Regional pond/stormwater connection.
- Housing options; townhomes not preferred.
- Sustainable elements of housing material.
- Transition to adjacent industrial use.
- Apply *village* concept to the project.

Items to be addressed: *Planning Commission should consider if the applicant has addressed the January 11, 2022 comments specifically public amenity, alternative housing consideration, and village concept.*

CHANGES SINCE LAST PLANNING COMMISSION REVIEW

The applicant has proposed the following changes to the Site Plan since the last submittal:

- Reoriented layout of townhomes.
- Reduced the number of units from 182 to 146, consisting of 20 detached single-family home, 56 attached single-family home, and 70 attached single-family townhomes
- Reduced the unit density from 8.85 units per acre to 7.13 acres per unit, in alignment with the RT (one-family attached) zoning that applies to most of the property
- Added a central village commons park area
- Added three (3) pocket parks in the attached single-family townhome community
- Added four (4) open space areas in the attached single-family home neighborhood
- Added an emergency vehicle access connecting the detached single-family home neighborhood to the attached single-family home neighborhood
- Added two (2) additional parking spaces to the guest & park parking lot

NATURAL FEATURES

Topography: A topographic survey has been provided on sheet A-1. The site is relatively flat.

Wetlands: There are four (4) wetlands on site, one of which is likely regulated by EGLE. The largest wetland is 0.7 acres and the smallest two wetlands are each 0.06 acres. The largest wetland, which is located along the western property line is regulated by EGLE. Please note that EGLE has the final authority on the extent of regulated wetlands, lakes, and streams in the State of Michigan. Any proposed impact to the areas that ASTI has identified as regulated will require an EGLE permit. A EGLE permit is required prior to final site plan approval.

Floodplain: There is no floodplain on site.

Woodlands: A tree inventory and replacement plan has been provided on Sheet L1, with replacement trees shown in the landscape plan on Sheet L101. The applicant surveyed a total 632 trees. They identified a total of 10 landmark trees, but didn't include the total woodland trees removed and detailed calculations. In total the applicant notes a replacement of 552 inches of trees, but we could not confirm this based on information provided.

Items to be addressed: *Provide detailed tree removal calculation details to confirm tree removal.*

SITE ARRANGEMENT

The applicant is proposing to construct three (3) residential neighborhoods on site, with 146 total housing units. The three connected neighborhoods will feature 20 detached single-family home, 56 attached single-family home, and 70 attached single-family townhomes. Each housing unit will have either a 1- of 2-car garage in addition to driveway parking and street parking. Within the attached single-family home and townhome neighborhoods, multiple community open spaces will be dispersed. On the southwest corner of the property, the applicant is proposing a large community park with ten public parking spaces and a sledding hill. A pedestrian walkway to proposed to run along the southwest property line, with the intention of offering a linkage between Long Lake Road and other developments to the south and west.

The applicant has maintained the townhomes, as opposed to providing an alternative housing option as requested by the Planning Commission. The Planning Commission in their previous review requesting a "Villaging" concept, which we interpreted to mean:

- Mix of housing options (excluding townhomes) and possibly non-residential uses.
- Orientation of housing types around a common and functional open space that allows for greater resident interaction.
- Consideration to an alternate amenity possibly all-season use, more centrally located.

Planning Commission to consider if the applicant

Items to be addressed: *Planning Commission to consider if the applicant has sufficiently redesigned the site and provided a "villaging" concept as requested by the Planning Commission.*

AREA, WIDTH, HEIGHT, SETBACKS

Schedule of Regulations and Modifications

Detached Single Family

	Required Setback	Provided Setback	Compliance
Front	25-ft	20-ft	Deviates 5-ft
Side	5-ft least / 15-ft total	5-ft least / 13-ft total	Deviates 2-ft
Rear	35-ft	35-ft	Complies
Building Height	2.5 stories / 30-ft in height	2 stories, 30-ft in height	Complies
Minimum Lot Area	5,000 square ft	6,625 square ft	Complies
Minimum Lot Frontage	40-ft	53-ft	Complies

Attached Single Family

	Required Setback	Provided Setback	Compliance
Front	25-ft	20-ft	Deviates 5-ft
Side	5-ft least / 15-ft total	15-ft least / 30-ft total	Complies
Rear	35-ft	30-ft	Deviates 5-ft
Building Height	2.5 stories / 30-ft in height	2 stories, 30-ft in height	Complies
Minimum Lot Area	5,000 square ft	Attached	N/A
Minimum Lot Frontage	40-ft	Attached	N/A

Attached 2-car Townhome

	Required Setback	Provided Setback	Compliance
Front	25-ft	N/A	N/A

Side	5-ft least / 15-ft total	5-ft least / 15-ft total	Complies
Rear	35-ft	N/A	N/A
Building Height	2.5 stories / 30-ft in height	3 stories, 35-ft in height	Deviates 0.5 stories/5-ft
Minimum Lot Area	5,000 square ft	Attached	N/A
Minimum Lot Frontage	40-ft	Attached	N/A

Attached 1-car Townhome

	Required Setback	Provided Setback	Compliance
Front	25-ft	N/A	N/A
Side	5-ft least / 15-ft total	5-ft least / 15-ft total	Complies
Rear	35-ft	N/A	N/A
Building Height	2.5 stories / 30-ft in height	3 stories, 35-ft in height	Deviates 0.5 stories/5-ft
Minimum Lot Area	5,000 square ft	Attached	N/A
Minimum Lot Frontage	40-ft	Attached	N/A

In summary the applicant is seeking the following deviations through the Planned Unit Development process:

1. 25 feet required / 20-foot proposed front yard (single family)
2. 15 feet required /13-foot side yard (single family)
3. 25 feet required / 20-foot proposed front yard (attached single family)
4. 35-foot required / 30-foot proposed rear yard (attached single family)
5. 2.5 stories – 30-foot height allowed / 3 stories – 35 feet height proposed (2-car townhomes)
6. 2.5 stories – 30-foot height allowed / 3 stories – 35 feet height proposed (1-car townhomes)

Items to be addressed: *None*

PARKING

Section 13.06.G of the Zoning Ordinance requires:

	Required	Provided

Residential (General): 2 spaces per unit	146 units = 292 spaces	446 spaces
Parking at park/sledding hill	NA	11 spaces
Bicycle Parking	2	Internal to building
Total	**292 spaces**	**457 spaces**

As set forth in section 13.06, it is the intent of this Ordinance to minimize excessive areas of pavement which reduces aesthetic standards and contributes to high rates of storm water runoff. Exceeding the minimum parking space requirements by more than twenty percent (20%) shall only be allowed with approval by the City. In granting such additional space, the City shall determine that such parking will be required, based on documented evidence, to accommodate the use on a typical day.

The applicant is providing over 57% the required parking on site. The applicant shall justify the excess parking or reduce the provided amount.

Items to be Addressed: *Justify the excess parking or reduce the provided amount.*

SITE ACCESS AND CIRCULATION

Vehicle access is via Rochester Road with additional access from E Long Lake Road. There is no direct access to the attached single-family housing neighborhood from E. Long Lake Road. We anticipate a significant amount of traffic will use the drive that services the single-family homes. In mixed housing type developments, traffic is generally oriented away from the single-family portion and more towards the multiple family portion.

Items to be addressed: *Consider ways to reduce traffic being directly accessed through drive that services single-family homes.*

TRAFFIC

OHM reviewed the traffic impact study prepared by Fleis & VandenBrink Engineering, Inc., and it dated June 22, 2022. The proposed site includes 20 single-family residential homes, 56 two-story townhomes, and 70 three-story townhomes, for a combined total of 146 dwelling units. There are two proposed access points, one on Long Lake Road and one on Rochester Road.

OHM recommends approval of the traffic impact study and its recommendations, subject to providing additional information as noted below.

1. The proposed left turn lane and associated changes on Long Lake Rd must be approved by RCOC and OHM defers to RCOC for approval.
2. Crash Analysis: OHM recommends that the TIS should include crash analysis of Rochester at Glaser Dr and recommendations to improve safety if any are deemed appropriate.

Items to be addressed: *None*

LANDSCAPING

	Required:	Provided:	Compliance:
Greenbelt Planting			
Long Lake: 1 tree every 30 feet	684 / 30 = 23	10 trees	Does not comply
Rochester: 1 tree every 30 feet	80 / 30 = 3	3 trees	Complies
Street Trees			
Internal Roads: 1 tree every 50 feet	4,901 / 50 = 98 trees	98 trees	Complies
ROW Screening			
Landscape buffering: Required buffering of alternative 2.	1 large evergreen every 10 feet or 1 narrow evergreen every 3 feet.	48 trees.	Does not comply

	684 / 10 = 69 trees Alternative screening method may be considered by the Planning Commission.		
Parking Lot Landscaping			
1 tree per every 8 parking spaces	81 spaces = 11 trees	11 trees	Complies
Overall			
Site landscaping: A minimum of twenty percent (20%) of the site area shall be comprised of landscape material. Up to twenty-five percent (25%) of the required landscape area may be brink, stone, pavers, or other public plaza elements, but shall not include any parking area or required sidewalks.	20%	Applicant notes 44%	Complies

Trash

The applicant has not shown an exterior trash dumpster. It is assumed trash will be located in individual garages in carts and rolled out. Applicant should confirm.

***Items to be Addressed**: 1). Provide required screening along Long Lake; and 2). Confirm trash location.*

PHOTOMETRICS

The applicant provided a lighting and photometric plan. The applicant proposes one (1) downward facing light for each multiple family units. Lighting for single-family will vary depending on homeowner's desire.

***Items to be Addressed:** None*

FLOOR PLAN AND ELEVATIONS

The applicant has provided concept rendering, detailed elevations, detailed floor plans, and photos of each type. As described by the applicant:

- *The Claremont, Hawhtorne, Norwood, Raleigh, Sheridan and Whitmore plans are for the single family lots on the west side of the development.*

- *The attached single family (2-story) plans to the east of those lots are referenced in the 5 unit and 6 unit elevation files, and also shown in more detail on the files called WO 1370-22 and WO 2331-21.*
- *The last two products are the 16' wide 1-car townhomes (HudsonTowns_16) and the 20' wide 2-car townhomes (HudsonTowns_20).*

Materials include brick, board and batten and vinyl siding. The front elevation includes significant architectural detail and the inclusion of porches/outdoor overhangs. We note the rear elevation are very garage dominated.

The applicant has provide a "architectural map" that shows proposed product by location on site plan.

Items to be Addressed: *Planning Commission should consider materials and architectural details.*

SITE PLAN REVIEW STANDARDS

Site Plan review standards provide the Planning Commission with direction when reviewing the proposed site plan and design features of this development.

Section 8.06 outlines Site Plan Review Design Standards.

- *Development shall ensure compatibility to existing commercial districts and provide a transition between land uses.*
    a. *Building design shall enhance the character of the surrounding area in relation to building and parking placement, landscape and streetscape features, and architectural design.*
    b. *Street fronts shall provide a variety of architectural expression that is appropriate in its context and prevents monotony.*
    c. *Building design shall achieve a compatible transition between areas with different height, massing, scale, and architectural style.*

- *Development shall incorporate the recognized best architectural building design practices.*
    a. *Foster a lasting impact on the community through the provision of high quality design, construction, and detailing.*
    b. *Provide high quality, durable materials, such as but not limited to stone, brick, glass, and metal. E.I.F.S. or material equivalent shall only be used as an accent material.*
    c. *Develop buildings with creativity that includes balanced compositions and forms.*
    d. *Design roofs that are appropriate to the architectural style of the building and create an appropriate visual exterior mass of the building given the context of the site.*

e. *For commercial buildings, incorporate clearly defined, highly visible customer entrances using features such as canopies, porticos, arcades, arches, wing walls, ground plane elements, and/or landscape planters.*
f. *Include community amenities that add value to the development such as patio/ seating areas, water features, art work or sculpture, clock towers, pedestrian plazas with park benches or other features located in areas accessible to the public.*

- *Enhance the character, environment and safety for pedestrians and motorists.*
    a. *Provide elements that define the street and the pedestrian realm.*
    b. *Create a connection between the public right of way and ground floor activities.*
    c. *Create a safe environment by employing design features to reduce vehicular and pedestrian conflict, while not sacrificing design excellence.*
    d. *Enhance the pedestrian realm by framing the sidewalk area with trees, awnings, and other features.*
    e. *Improve safety for pedestrians through site design measures.*

PUD AGREEMENT

The applicant has submitted a PUD Agreement, which is being reviewed by the City Attorneys office.

PUD STANDARDS

When reviewing the PUD, the Planning Commission shall consider the following standards as set forth in Section 11.03:

1. *A mixture of land uses that would otherwise not be permitted without the use of the PUD provided that other objectives of this Article are also met.*
2. *A public improvement or public facility (e.g. recreational, transportation, safety and security) which will enhance, add to or replace those provided by public entities, thereby furthering the public health, safety and welfare.*
3. *A recognizable and material benefit to the ultimate users of the project and to the community, where such benefit would otherwise be infeasible or unlikely to be achieved absent these regulations.*
4. *Long-term protection and preservation of natural resources, natural features, and historic and cultural resources, of a significant quantity and/or quality in need of protection or preservation, and which would otherwise be unfeasible or unlikely to be achieved absent these regulations.*
5. *A compatible mixture of open space, landscaped areas, and/or pedestrian amenities.*
6. *Appropriate land use transitions between the PUD and surrounding properties.*
7. *Design features and techniques, such as green building and low impact design, which will promote and encourage energy conservation and sustainable development.*
8. *Innovative and creative site and building designs, solutions and materials.*
9. *The desirable qualities of a dynamic urban environment that is compact, designed to human scale, and exhibits contextual integration of buildings and city spaces.*

10. *The PUD will reasonably mitigate impacts to the transportation system and enhance non-motorized facilities and amenities.*
11. *For the appropriate assembly, use, redevelopment, replacement and/ or improvement of existing sites that are occupied by obsolete uses and/or structures.*
12. *A complementary variety of housing types that is in harmony with adjacent uses.*
13. *A reduction of the impact of a non-conformity or removal of an obsolete building or structure.*
14. *A development consistent with and meeting the intent of this Article, which will promote the intent of the Master Plan or the intent of any applicable corridor or sub-area plans. If conditions have changed since the Plan, or any applicable corridor or sub-area plans were adopted, the uses shall be consistent with recent development trends in the area.*
15. *Includes all necessary information and specifications with respect to structures, heights, setbacks, density, parking, circulation, landscaping, amenities and other design and layout features, exhibiting a due regard for the relationship of the development to the surrounding properties and uses thereon, as well as to the relationship between the various elements within the proposed Planned Unit Development. In determining whether these relationships have been appropriately addressed, consideration shall be given to the following:*
    i. *The bulk, placement, and materials of construction of the proposed structures and other site improvements.*
    ii. *The location and screening of vehicular circulation and parking areas in relation to surrounding properties and the other elements of the development.*
    iii. *The location and screening of outdoor storage, loading areas, outdoor activity or work areas, and mechanical equipment.*
    iv. *The hours of operation of the proposed uses.*
    v. *The location, amount, type and intensity of landscaping, and other site amenities.*
16. *Parking shall be provided in order to properly serve the total range of uses within the Planned Unit Development. The sharing of parking among the various uses within a Planned Unit Development may be permitted. The applicant shall provide justification to the satisfaction of the City that the shared parking proposed is sufficient for the development and will not impair the functioning of the development, and will not have a negative effect on traffic flow within the development and/or on properties adjacent to the development.*
17. *Innovative methods of stormwater management that enhance water quality shall be considered in the design of the stormwater system.*
18. *The proposed Planned Unit Development shall be in compliance with all applicable Federal, State and local laws and ordinances, and shall coordinate with existing public facilities.*

The Planning Commission should review the application considering the standards.

BENEFITS VS. DEVIATIONS

The applicant has noted the following benefits:

- Meeting the intent of the City's Master Plan
- Inclusion of ADA accessible sidewalks to provide for community connectivity
- Multiple Housing options for residents that are currently underserved
- Quality architecture and design that will complement and further enhance the area
- Significant open space provided throughout
- Unified community with an Association to maintain common areas
- Contribution to a regional stormwater solution
- Linkage to a pedestrian pathway system and trailhead
- Sledding hill and open space accessible to public but maintained by the established HOA

Deviations:

- Allowance of townhomes on currently zoned CB, Commercial Business district 25 feet required / 20-foot proposed front yard (single family)
- 15 feet required /13-foot side yard (single family)
- 25 feet required / 20-foot proposed front yard (attached single family)
- 35-foot required / 30-foot proposed rear yard (attached single family)
- 2.5 stories – 30-foot height allowed / 3 stories – 35 feet height proposed (2-car townhomes)
- 2.5 stories – 30-foot height allowed / 3 stories – 35 feet height proposed (1-car townhomes)

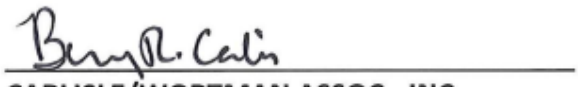
The Planning Commission should consider the noted benefits in light of the requested allowance in housing types and noted dimensional relief.

SUMMARY

As part of the deliberation, the Planning Commission should consider:

- Does the application meet the intent and standards of a Planned Unit Development?
- Difference/distinction from attached townships and attached single-family homes.
- If alternatives to townhomes were considered?
- Are the proposed benefits commensurate with the relief requested?
- Materials and architectural details.
- Has the applicant has sufficiently redesigned the site and provided a "villaging" concept as requested by the Planning Commission?

Sincerely,



CARLISLE/WORTMAN ASSOC., INC.

Re: Village of Troy PUD Site Plan Submittal
Vacant Property West of the SWC of Long Lake and Rochester Road
Parcel Numbers 2015201046 and 2015201033
City of Troy, MI

Robertson Brothers Homes is pleased to submit a PUD preliminary site plan application for vacant properties located west of the southwest corner of Long Lake Road and Rochester Road. The 20.48-acre property consists of two parcels with three different zoning classifications of RT, R-1C and CB. The Village of Troy community proposes 146 new for-sale detached single family homes (20), attached single-family homes (56), and attached single-family townhomes (70) that will add quality housing products that are sorely lacking in the area. The project is truly a village concept that will allow for multiple price points in an integrated plan with interconnectivity throughout.

On January 11, 2022, Robertson presented a concept plan for discussion to the Planning Commission. The plan presented consisted of 182 homes (20 single family, 55 attached condos and 107 townhomes). Much of the discussion with the Commission centered on density (particularly the townhomes), and a lack of open space and connectivity throughout the three villages. Robertson has significantly updated the plan in response to these comments. The density has been revised downward to 7.13 units per acre (from 8.85 units per acre). Most of the property is currently zoned RT (One-Family Attached), which allows for up to 8.7 units per acre per the City of Troy Zoning Ordinance. The plan has been furthered revised to include significant and purposeful open space areas, including a multi-functional park area at the southwest corner of the development, a Village Commons park area as a centered gathering feature within the community, as well as three pocket parks in the attached single-family townhome neighborhood and four open spaces areas in the attached single family home neighborhood. A community path extension is proposed to connect to a future City path from the southwest corner, traversing the community as it provides for a walk-by to these

open space areas and ultimately connecting to the sidewalk on Long Lake Road. Overall, the plan has been improved to provide for significantly more open space and connectivity than the previous plan, as requested by the Planning Commission.

The vision for the Village of Troy is centered in the philosophy of integration and connection. There will be a focus on choice for homebuyers, with four distinct home options along with four distinct price points.

- A smaller, detached single-family home series will be offered, ranging in size from one-story ranches at 1,850 square feet to two-story homes ranging from 1,900 to 3,100 square feet in size;
- The mid-level option consists of an 1,850 square foot attached single-family home plan that provides a large open floorplan on the first floor with three bedrooms and a loft upstairs. The plan will allow for semi-private outdoor space at the rear of the homes;
- A more attainable option will be an attached townhome, consisting of 1,600 square feet that provides for the option of 2 or 3-bedrooms and includes an attached two car garage;
- The entry price point will consist of attached townhomes ranging between 1,200 and 1,350 square feet with private attached single car garages. This home will cater to first time homebuyers that are looking for quality housing at an attainable price that is nearly non-existent in the City of Troy;

The Village of Troy is unique due to these varying options knitted together in an interconnected community.

As mentioned above, the plan will provide for an important pedestrian linkage to Long Lake Road from an envisioned trail system connecting to other developments to the south and west. The trail will allow for residents to walk their children to Leonard Elementary School, as well as providing a non-motorized connection to the Daisy Knight Dog Park. The Village of Troy will be one of the new developments that will contribute to a regional detention pond solution that is in the planning stage by the City. This regional pond is being planned to enlarge the current storm pond for the Troy DPW facility south of the project's boundary.

The construction of this regional pond will become a Troy community benefit, as it allows for one pond to maintain over individual ponds for each property, allowing for best practice design and reduction of future maintenance costs. Importantly, this new regional pond project is envisioned as a wet pond to serve as a central water feature for the pedestrian linkage between all of these properties, thereby providing a connection to Long Lake Road that would become a desirable amenity for all Troy residents. Robertson is willing to serve as the general contractor for the construction of the pond expansion in conjunction with our development, if the City desires.

The majority of the property (approximately 15 acres) is currently zoned RT (Residential Transitional), which allows 8.7 residential units per acre. The remainder of the site is zoned R1-C (the southwestern portion of the site) and C-B (the southeastern portion of the site). The site plan has been thoughtfully designed to lower in intensity starting from the industrial property and the DPW facility to the south and the commercial property to the east, as it fades to detached single family homes backing to existing single-family neighbors. Robertson has held two neighborhood meetings to discuss the property with nearby property owners. The site plan allows for plenty of parking, as each of the detached and attached single family homes include 2-car garages along with driveways and street parking for guests. The townhomes each include a private 1 or 2-car garage with plenty of parking spaces for guests.

The plan provides for the inclusion of a new scenic overlook and sledding hill and a trailhead to the proposed trail system to the south. We envision that the trailhead and sledding/overlook hill could be public amenities but maintained by our development, a concept Robertson has successfully developed in other communities recently. The sledding/overlook hill will also function to screen the City's DPW salt dome for those living in the community and the public that will utilize the trail.

While the property is zoned residential, it is challenged due to its proximity to intense commercial and industrial land uses. As such, the site has been designed to buffer appropriately and is a creative and logical land use transition from these higher intense areas to the east and south to existing residential homes to the west. We are proposing to develop the property under the City's PUD (Planned

Unit Development) Ordinance. While the overall density proposed is actually less than the RT zoning district allows, the PUD provides the flexibility required to address the screening of the industrial property to the south with a more market appropriate entry-level townhome product, and provides for slight modifications to the development standards that enable a comprehensive village concept, to provide for multiple options to homebuyers at different price points. Proposed development standards are shown below.

Schedule of Regulations and Modifications
The Village of Troy - *Detached Single Family*

	RT Zoning District	Village of Troy *Detached Single Family*	Deviations
Min. Building Setbacks			
Front Setback (Bldg)	25’	20’	5’
Side Min. Principal	5’ Least / 15’ Total	5’ Least / 13’ Total	2’
Rear Setback Principal	35’	35’	In Compliance
Minimum Lot Area	5,000 Square Feet	6,625 Square Feet	In Compliance
Minimum Lot Frontage	40’	53’	In Compliance
Principal Building Height to Midpoint	2.5 Stories / 30 Feet	2 Stories / 30 Feet	In Compliance

Section 11.03.B of the Troy Zoning Ordinance provides for standards in the justification of the use of a PUD for a given development. We believe that the Village of Troy meets these standards as described below (Robertson comments in blue).

B. The applicant shall demonstrate that through the use of the PUD option, the development will accomplish a sufficient number of the following objectives, as are reasonably applicable to the site, providing:

1. A mixture of land uses that would otherwise not be permitted without the use of the PUD provided that other objectives of this Article are also met.

   The concept of the Village of Troy is to provide for varying levels of price points, such that the needs of several subsets of homebuyers can be met. In order to do this, minor flexibility is needed for a couple of development standards.

2. A public improvement or public facility (e.g. recreational, transportation, safety and security) which will enhance, add to or replace those provided by public entities, thereby furthering the public health, safety and welfare.

   Several public improvements are proposed as a result of the development. The community will be a large financial contributor to the future regional detention basin project that the City is currently designing. Having one single pond to maintain is better for the environment and considerably more efficient to maintain and oversee. Additionally, the project proposes to include a very important link to the City's pedestrian trail system, which is a significant quality of life amenity for residents in the entire area. The pedestrian trail will be a focus of the development and will be completely open to the public for use through the community. Lastly, there will be passive and active

open space (including a multi-functional park) located along the path as shown on the landscape plan.

3. A recognizable and material benefit to the ultimate users of the project and to the community, where such benefit would otherwise be infeasible or unlikely to be achieved absent these regulations.

   Several benefits will be realized as a result of the development, including the pathway connection, contribution to a regional detention pond, active and passive open space areas that can be accessed by the public, and housing options (including single level detached homes) for future homebuyers that have no other options to stay in the City of Troy.

4. Long-term protection and preservation of natural resources, natural features, and historic and cultural resources, of a significant quantity and/or quality in need of protection or preservation, and which would otherwise be unfeasible or unlikely to be achieved absent these regulations.

   The community plan enhances the utilization of the significant wetland complex to the south and west by providing for the connection of the pedestrian pathway.

5. A compatible mixture of open space, landscaped areas, and/or pedestrian amenities.

   The Village of Troy is centered around the concept of balance of both passive and active open space and pedestrian amenities, set in a mixed village concept of housing typologies. There will be 2,000 lineal feet of 8’ pathway through the project (and over 6,000 lineal feet of sidewalks overall), and over 10 acres of open space provided (roughly 50% of the site).

6. Appropriate land use transitions between the PUD and surrounding properties.

The community has been thoughtfully designed to buffer the existing residential properties to the west from the more intense surrounding industrial land uses to the south and commercial land uses to the east,

7. Design features and techniques, such as green building and low impact design, which will promote and encourage energy conservation and sustainable development.

   The Village of Troy will be constructed with the most modern and energy efficient materials and construction methods, with the intent to create a best-in-class energy efficient community. All Robertson Homes are built in exceedance of current building codes as verified by DR Nelson, who are independent residential energy code experts. Currently, a Robertson Brothers Home is on average 10% to 15% more energy efficient than a code compliant home. Further, each home within the community will be pre-wired for electric vehicle charging units.

8. Innovative and creative site and building designs, solutions and materials.

   The site has been thoughtfully designed to maximize the importance and usability of the pedestrian pathway and open space areas. Materials used will be of high quality and high durability for easy maintenance for future home buyers.

9. The desirable qualities of a dynamic urban environment that is compact, designed to human scale, and exhibits contextual integration of buildings and city spaces.

   The Village of Troy is designed around the concept of integration and appropriate scale, that provides for a dynamic mix of future residents. Additionally, the public will be encouraged to traverse the community and be part of the outdoor spaces that interconnect the development with Troy schools and parks.

10. The PUD will reasonably mitigate impacts to the transportation system and enhance non-motorized facilities and amenities.

    The location of the community on an important future pedestrian and bicycle trail is a central theme for the Village of Troy. Both the residents that live within the community and those that live in the surrounding area will be encouraged to utilize the non-motorized pathway to move about the City. As mentioned above, there will be 2,000 lineal feet of 8' pathway through the project (and over 6,000 lineal feet of sidewalks overall),

11. For the appropriate assembly, use, redevelopment, replacement and/or improvement of existing sites that are occupied by obsolete uses and/or structures.

    The entire property has been obsolete for decades and has been an eyesore that is severely in need of clean up. The project will provide an important redevelopment of a difficult vacant property that will provide for future tax revenues and consumers for local Troy businesses.

12. A complementary variety of housing types that is in harmony with adjacent uses.

    The Village of Troy will provide four distinct housing options for home buyers that have very limited options in the local housing market. Additionally, the plan has been deliberately designed to back single family to single family, thereby complementing the adjacent residential neighborhood.

13. A reduction of the impact of a non-conformity or removal of an obsolete building or structure.

    The property has served as a construction staging site for several road projects over the past decades. Development of the property will remove and redevelop an obsolete and dangerous property.

14. A development consistent with and meeting the intent of this Article, which will promote the intent of the Master Plan or the intent of any applicable corridor or sub-area plans. If conditions have changed since the Plan, or any applicable corridor or sub-area plans were adopted, the uses shall be consistent with recent development trends in the area.

    Chapter 8 of Troy's Master Plan focuses on efforts to provide for a mix of housing, and the need for options for homebuyers that include "Missing Middle Housing". The Village of Troy plan specifically provides for a mix of housing, on a long-abandoned property, at a location that has been targeted for medium density residential with RT zoning. The community will provide a means of homeownership within the City that is sorely lacking in the current market environment (including attainable housing options as well as single level detached living). Simply put, people want to move to Troy and all it has to offer but cannot find adequate quality housing at a price that is attainable for their families. The Village of Troy is an appropriate use of land, that provides for connectivity with commercial and open space land uses through the development of a new trail system.

15. Includes all necessary information and specifications with respect to structures, heights, setbacks, density, parking, circulation, landscaping, amenities and other design and layout features, exhibiting a due regard for the relationship of the development to the surrounding properties and uses thereon, as well as to the relationship between the various elements within the proposed Planned Unit Development. In determining whether these relationships have been appropriately addressed, consideration shall be given to the following:
    a. The bulk, placement, and materials of construction of the proposed structures and other site improvements.

        The site plan has been thoughtfully designed to minimize impact to existing residential land uses, and provide for buffering within the community to external commercial and industrial land uses.

b. The location and screening of vehicular circulation and parking areas in relation to surrounding properties and the other elements of the development.

Parking areas will be screened appropriately within the development.

c. The location and screening of outdoor storage, loading areas, outdoor activity or work areas, and mechanical equipment.

No outdoor storage or loading areas are proposed. Air conditioning units will be screened appropriately from public view.

d. The hours of operation of the proposed uses.

N/A to the proposed land use.

e. The location, amount, type and intensity of landscaping, and other site amenities.

Generous landscaping and open space amenities will be provided within the community, as shown on the provided landscape plans.

16. Parking shall be provided in order to properly serve the total range of uses within the Planned Unit Development. The sharing of parking among the various uses within a Planned Unit Development may be permitted. The applicant shall provide justification to the satisfaction of the City that the shared parking proposed is sufficient for the development and will not impair the functioning of the development, and will not have a negative effect on traffic flow within the development and/or on properties adjacent to the development.

Sufficient parking will be provided within the Village of Troy development plan. The majority of the homes will include an attached

2-car garage, with all of the detached and attached single family homes providing a driveway for guest parking along with street parking. The townhomes located at the south end of the project will include either a 2-car or 1-car attached garage, along with substantial guest parking located throughout, such that 2.65 parking spaces will be provided for every townhome unit.

In addition, the current plan proposes parking spaces for the park area for use as a trailhead to be used by the public.

17. Innovative methods of stormwater management that enhance water quality shall be considered in the design of the stormwater system.

Chapter 9 of Troy's Master Plan focuses on the Rochester Road corridor to become a "regional showcase for effective stormwater management and enhancement of the natural environment, while encouraging a combination of high-quality land uses" (Page 87). Further, the plan encourages that "New construction along the corridor may include detention and retention basins that work together from site-to-site". As mentioned in the project narrative, the development will be a major contributor to the regional detention pond currently being designed by the City on the DPW yard property, which will improve the storm water management of the area.

18. The proposed Planned Unit Development shall be in compliance with all applicable Federal, State and local laws and ordinances, and shall coordinate with existing public facilities.

The Village of Troy will meet or exceed all applicable laws and ordinances.

Following are the concept plans and elevations of the proposed housing products.

ROBERTSON BROTHERS HOMES

Concept Plan

Product Design

The proposed elevations were designed specifically for this location to reflect a blend of traditional and contemporary design elements, that will both blend in with the urban fabric while also maintaining a fresh look that will stand the test of time. The building designs will create a complementary and cohesive village of homes.

ROBERTSON BROTHERS HOMES

Entrance from Long Lake Road to Proposed Community

Internal View of Proposed Community

There are several public benefits to the project overall, such as:

- Meeting the intent of the City's Master Plan
- Inclusion of ADA accessible sidewalks to provide for community connectivity
- Multiple Housing options for residents that are currently underserved
- Quality architecture and design that will complement and further enhance the area
- Significant open space provided throughout
- Unified community with an Association to maintain common areas
- Contribution to a regional stormwater solution
- Linkage to a pedestrian pathway system and trailhead
- Sledding hill and open space accessible to public but maintained by the established HOA

Robertson Brothers Homes is pleased to present the Village of Troy site plan for PUD consideration by the Planning Commission. We believe the development will ultimately become a point of pride for responsible development in a solid area and importantly will provide for housing needs in the community.

Please let me know if any additional information is required at this time.

Thank you.

MISS DIG / UTILITY DISCLAIMER NOTE

A MISS DIG TICKET NUMBER A010670149, PURSUANT TO MICHIGAN PUBLIC ACT 174 WAS ENTERED FOR THE SURVEYED PROPERTY. DUE TO THE EXTENDED REPORTING PERIOD FOR UNDERGROUND FACILITY OWNERS TO PROVIDE THEIR RECORDS, THE SURVEY MAY NOT REFLECT ALL THE UTILITIES AT THE TIME THE SURVEY WAS ISSUED ON APRIL 14, 2021. THE SURVEY ONLY REFLECTS THOSE UTILITIES WHICH COULD BE OBSERVED BY THE SURVEYOR IN THE FIELD OR AS DEPICTED BY THE UTILITY COMPANY RECORDS FURNISH PRIOR TO THE DATE THIS SURVEY WAS ISSUED. THE CLIENT AND/OR THEIR AUTHORIZED AGENT SHALL VERIFY WITH THE FACILITY OWNERS AND/OR THEIR AUTHORIZED AGENTS, THE COMPLETENESS AND EXACTNESS OF THE UTILITIES LOCATION.

TOPOGRAPHIC SURVEY NOTES

ALL ELEVATIONS ARE EXISTING ELEVATIONS, UNLESS OTHERWISE NOTED.

UTILITY LOCATIONS WERE OBTAINED FROM MUNICIPAL OFFICIALS AND RECORDS OF UTILITY COMPANIES, AND NO GUARANTEE CAN BE MADE TO THE COMPLETENESS, OR EXACTNESS OF LOCATION.

CERTIFICATE OF SURVEY

CERTIFIED TO:

–ROBERTSON BROTHERS CO., OR ITS/THEIR NOMINEE OR ASSIGNEE
–GOOD DEVELOPMENT HOLDINGS, LLC, A MICHIGAN LIMITED LIABILITY COMPANY
–FIRST AMERICAN TITLE INSURANCE COMPANY

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDE ITEMS 1, 2, 3, 4, 6(a), 6(b), 7(a), 7(b)(1), 7(c), 8, 9, 11(a), 13, 14, 16, 17, 18 AND 19 OF TABLE A THEREOF. THE FIELD WORK WAS COMPLETED ON APRIL 9, 2021.

4–14–2021

KEVIN NAVAROLI, P.S. NO. 4001053503 DATE

TITLE REPORT NOTES

REFERENCE FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NUMBER: 919508, DATED: FEBRUARY 2, 2021.

SCHEDULE B, PART II – EXCEPTIONS:

EXCEPTIONS: 1, 4, 5, 6, 7, 25 AND 27 REFER TO THE OWNERSHIP OF THE PROPERTY AND/OR ARE NOT PLOTTABLE.

2. ANY FACTS, RIGHTS, INTERESTS, OR CLAIMS THAT ARE NOT SHOWN BY THE PUBLIC RECORDS BUT THAT COULD BE ASCERTAINED BY MAKING INQUIRY OF PERSONS IN POSSESSION OF THE LAND.

3. EASEMENTS, ENCUMBRANCES, OR CLAIMS THEREOF, NOT SHOWN BY THE PUBLIC RECORDS.

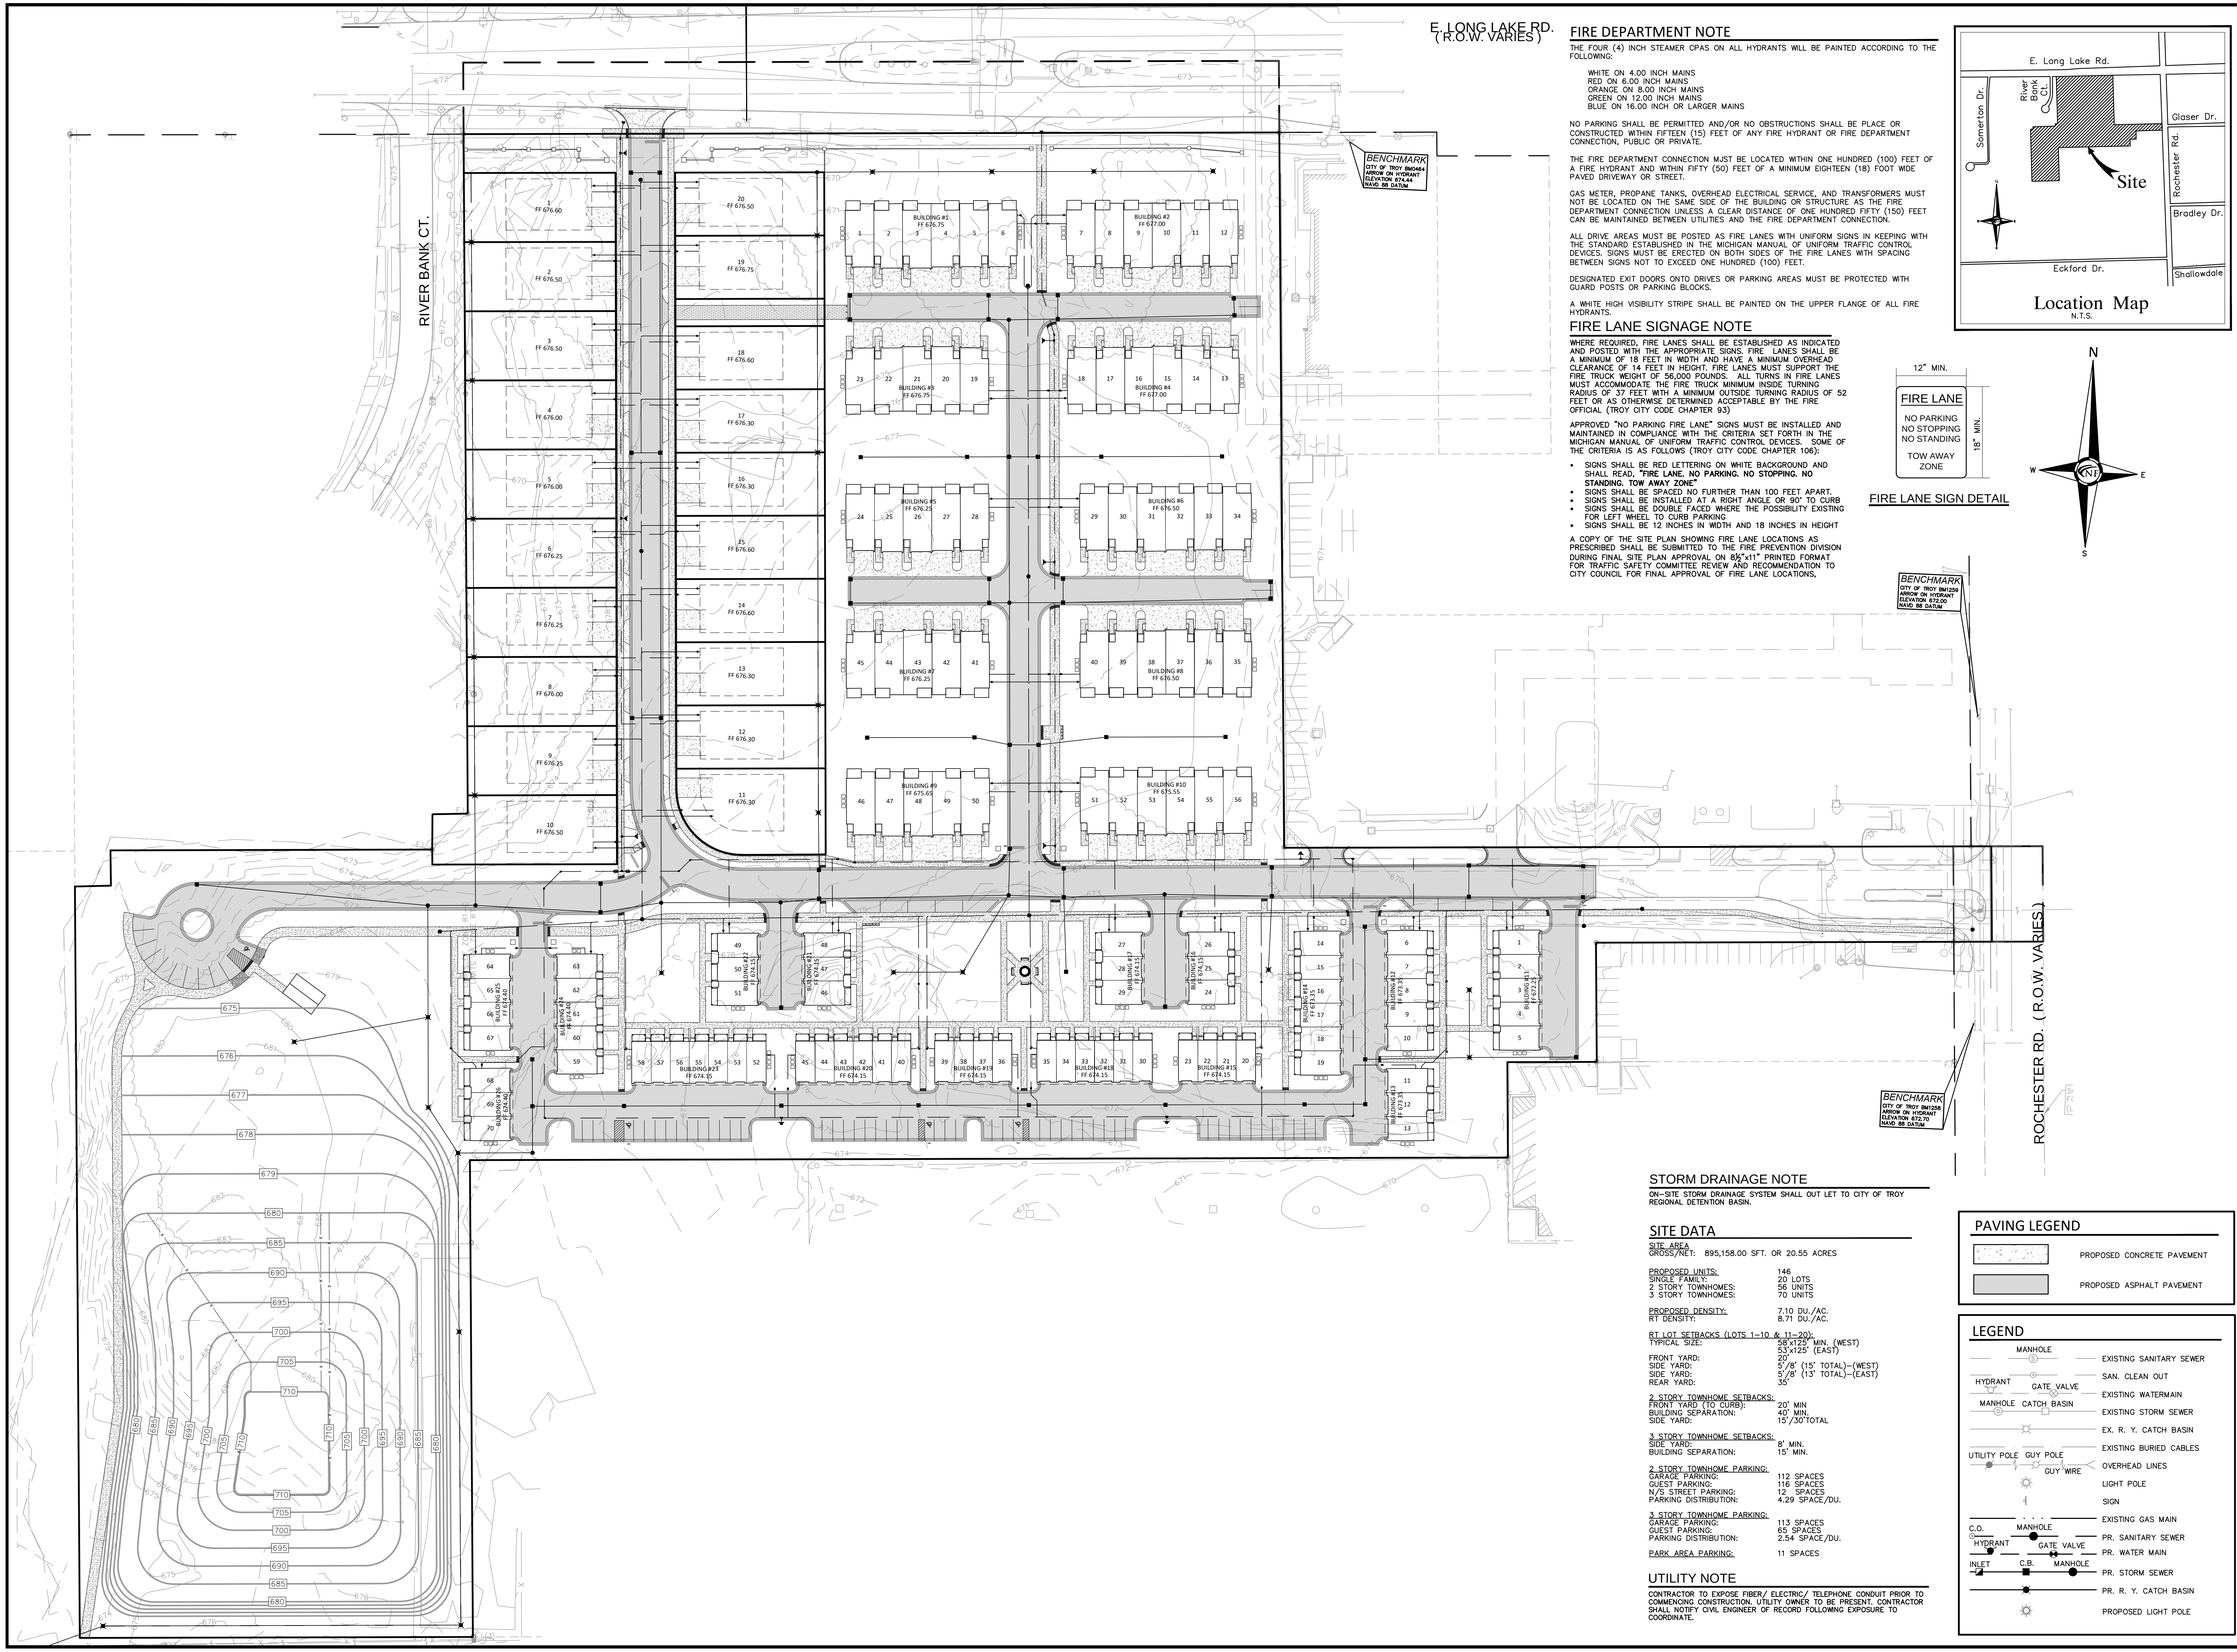
DATE ISSUED/REVISED
04-14-21 SURVEY ISSUED
03-29-22 ISSUED FOR PRELIMINARY SITE PLAN REVIEW

DRAWN BY:
M. Carnaghi
DESIGNED BY:
APPROVED BY:
K. Navaroli
DATE:
April 14, 2021
SCALE: 1" = 40'
40 20 0 20 40 60

NFE JOB NO. **J943-01**
SHEET NO. **SP06**



FIRE DEPARTMENT NOTE

THE FOUR (4) INCH STEAMER CPAS ON ALL HYDRANTS WILL BE PAINTED ACCORDING TO THE FOLLOWING:

WHITE ON 4.00 INCH MAINS
RED ON 6.00 INCH MAINS
ORANGE ON 8.00 INCH MAINS
GREEN ON 12.00 INCH MAINS
BLUE ON 16.00 INCH OR LARGER MAINS

NO PARKING SHALL BE PERMITTED AND/OR NO OBSTRUCTIONS SHALL BE PLACE OR CONSTRUCTED WITHIN FIFTEEN (15) FEET OF ANY FIRE HYDRANT OR FIRE DEPARTMENT CONNECTION, PUBLIC OR PRIVATE.

THE FIRE DEPARTMENT CONNECTION MJST BE LOCATED WITHIN ONE HUNDRED (100) FEET OF A FIRE HYDRANT AND WITHIN FIFTY (50) FEET OF A MINIMUM EIGHTEEN (18) FOOT WIDE PAVED DRIVEWAY OR STREET.

GAS METER, PROPANE TANKS, OVERHEAD ELECTRICAL SERVICE, AND TRANSFORMERS MUST NOT BE LOCATED ON THE SAME SIDE OF THE BUILDING OR STRUCTURE AS THE FIRE DEPARTMENT CONNECTION UNLESS A CLEAR DISTANCE OF ONE HUNDRED FIFTY (150) FEET CAN BE MAINTAINED BETWEEN UTILITIES AND THE FIRE DEPARTMENT CONNECTION.

ALL DRIVE AREAS MUST BE POSTED AS FIRE LANES WITH UNIFORM SIGNS IN KEEPING WITH THE STANDARD ESTABLISHED IN THE MICHIGAN MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES. SIGNS MUST BE ERECTED ON BOTH SIDES OF THE FIRE LANES WITH SPACING BETWEEN SIGNS NOT TO EXCEED ONE HUNDRED (100) FEET.

DESIGNATED EXIT DOORS ONTO DRIVES OR PARKING AREAS MUST BE PROTECTED WITH GUARD POSTS OR PARKING BLOCKS.

A WHITE HIGH VISIBILITY STRIPE SHALL BE PAINTED ON THE UPPER FLANGE OF ALL FIRE HYDRANTS.

FIRE LANE SIGNAGE NOTE

WHERE REQUIRED, FIRE LANES SHALL BE ESTABLISHED AS INDICATED AND POSTED WITH THE APPROPRIATE SIGNS. FIRE LANES SHALL BE A MINIMUM OF 18 FEET IN WIDTH AND HAVE A MINIMUM OVERHEAD CLEARANCE OF 14 FEET IN HEIGHT. FIRE LANES MUST SUPPORT THE FIRE TRUCK WEIGHT OF 56,000 POUNDS. ALL TURNS IN FIRE LANES MUST ACCOMMODATE THE FIRE TRUCK MINIMUM INSIDE TURNING RADIUS OF 37 FEET WITH A MINIMUM OUTSIDE TURNING RADIUS OF 52 FEET OR AS OTHERWISE DETERMINED ACCEPTABLE BY THE FIRE OFFICIAL (TROY CITY CODE CHAPTER 93)

APPROVED "NO PARKING FIRE LANE" SIGNS MUST BE INSTALLED AND MAINTAINED IN COMPLIANCE WITH THE CRITERIA SET FORTH IN THE MICHIGAN MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES. SOME OF THE CRITERIA IS AS FOLLOWS (TROY CITY CODE CHAPTER 106):

- SIGNS SHALL BE RED LETTERING ON WHITE BACKGROUND AND SHALL READ, **"FIRE LANE, NO PARKING. NO STOPPING. TOW AWAY ZONE"**
- SIGNS SHALL BE SPACED NO FURTHER THAN 100 FEET APART.
- SIGNS SHALL BE INSTALLED AT A RIGHT ANGLE OR 90° TO CURB
- SIGNS SHALL BE DOUBLE FACED WHERE THE POSSIBILITY EXISTING FOR LEFT WHEEL TO CURB PARKING
- SIGNS SHALL BE 12 INCHES IN WIDTH AND 18 INCHES IN HEIGHT

A COPY OF THE SITE PLAN SHOWING FIRE LANE LOCATIONS AS PRESCRIBED SHALL BE SUBMITTED TO THE FIRE PREVENTION DIVISION DURING FINAL SITE PLAN APPROVAL ON 8½"x11" PRINTED FORMAT FOR TRAFFIC SAFETY COMMITTEE REVIEW AND RECOMMENDATION TO CITY COUNCIL FOR FINAL APPROVAL OF FIRE LANE LOCATIONS.

FIRE LANE SIGN DETAIL

STORM DRAINAGE NOTE

ON-SITE STORM DRAINAGE SYSTEM SHALL OUT LET TO CITY OF TROY REGIONAL DETENTION BASIN.

NFE JOB NO. **J943-01**

SHEET NO. **SP11**

GENERAL PAVING NOTES

PAVEMENT SHALL BE OF THE TYPE, THICKNESS AND CROSS SECTION AS INDICATED ON THE PLANS AND AS FOLLOWS:

CONCRETE: PORTLAND CEMENT TYPE IA (AIR-ENTRAINED) WITH A MINIMUM CEMENT CONTENT OF SIX SACKS PER CUBIC YARD, MINIMUM 28 DAY COMPRESSIVE STRENGTH OF 3,500 PSI AND A SLUMP OF 1 1/2 TO 3 INCHES.

ASPHALT: BASE COURSE – MDOT BITUMINOUS MIXTURE NO. 1100L, 20AA; SURFACE COURSE – MDOT BITUMINOUS MIXTURE NO. 1100T, 20AA; ASPHALT CEMENT PENETRATION GRADE 85–100, BOND COAT – MDOT SS–1H EMULSION AT 0.10 GALLON PER SQUARE YARD; MAXIMUM 2 INCH LIFT.

PAVEMENT BASE SHALL BE COMPACTED TO 95% OF THE MAXIMUM DENSITY (MODIFIED PROCTOR) PRIOR TO PLACEMENT OF PROPOSED PAVEMENT. EXISTING SUB–BASE SHALL BE PROOF–ROLLED IN THE PRESENCE OF THE ENGINEER TO DETERMINE STABILITY.

ALL CONCRETE PAVEMENT, DRIVEWAYS, CURB & GUTTER, ETC., SHALL BE SPRAY CURED WITH WHITE MEMBRANE CURING COMPOUND IMMEDIATELY FOLLOWING FINISHING OPERATION.

ALL CONCRETE PAVEMENT JOINTS SHALL BE FILLED WITH HOT POURED RUBBERIZED ASPHALT JOINT SEALING COMPOUND IMMEDIATELY AFTER SAWCUT OPERATION. FEDERAL SPECIFICATION SS–S164.

ALL WORKMANSHIP AND MATERIALS SHALL BE IN ACCORDANCE WITH THE CURRENT STANDARDS AND SPECIFICATIONS OF THE MUNICIPALITY AND THE MICHIGAN DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR CONSTRUCTION, CURRENT EDITION.

ALL TOP OF CURB ELEVATIONS, AS SHOWN ON THE PLANS, ARE CALCULATED FOR A 6" CONCRETE CURB UNLESS OTHERWISE NOTED.

ALL SIDEWALK RAMPS, CONFORMING TO PUBLIC ACT NO. 8, 1993, SHALL BE INSTALLED AS INDICATED ON THE PLANS.

CONSTRUCTION OF A NEW OR RECONSTRUCTED DRIVE APPROACH CONNECTING TO AN EXISTING STATE OR COUNTY ROADWAY SHALL BE ALLOWED ONLY AFTER AN APPROVED PERMIT HAS BEEN SECURED FROM THE AGENCY HAVING JURISDICTION OVER SAID ROADWAY.

FOR ANY WORK WITHIN THE PUBLIC RIGHT–OF–WAY, THE CONTRACTOR SHALL PAY FOR AND SECURE ALL NECESSARY PERMITS AND LIKEWISE ARRANGE FOR ALL INSPECTION.

EXISTING TOPSOIL, VEGETATION AND ORGANIC MATERIALS SHALL BE STRIPPED AND REMOVED FROM PROPOSED PAVEMENT AREA PRIOR TO PLACEMENT OF BASE MATERIALS.

EXPANSION JOINTS SHOULD BE INSTALLED AT THE END OF ALL INTERSECTION RADII.

SIDEWALK RAMPS, CONFORMING TO PUBLIC ACT NO. 8, 1973, SHALL BE INSTALLED AS SHOWN AT ALL STREET INTERSECTIONS AND AT ALL BARRIER FREE PARKING AREAS AS INDICATED ON THE PLANS.

ALL PAVEMENT AREAS SHALL BE PROOF–ROLLED UNDER THE SUPERVISION OF A GEOTECHNICAL ENGINEER PRIOR TO THE PLACEMENT OF BASE MATERIALS AND PAVING MATERIALS.

FILL AREAS SHALL BE MACHINE COMPACTED IN UNIFORM LIFTS NOT EXCEEDING 9 INCHES THICK TO 98% OF THE MAXIMUM DENSITY (MODIFIED PROCTOR) PRIOR TO PLACEMENT OF PROPOSED PAVEMENT.

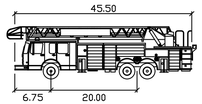
FIRE LANE SIGN DETAIL

Tower Truck

	feet
Width	: 8.33
Track	: 8.33
Lock to Lock Time	: 6.0
Steering Angle	: 33.3



Fire Truck

	feet
Width	: 8.50
Track	: 8.50
Lock to Lock Time	: 6.0
Steering Angle	: 33.3

FIRE DEPARTMENT NOTE

THE FOUR (4) INCH STEAMER CPAS ON ALL HYDRANTS WILL BE PAINTED ACCORDING TO THE FOLLOWING:

WHITE ON 4.00 INCH MAINS
RED ON 6.00 INCH MAINS
ORANGE ON 8.00 INCH MAINS
GREEN ON 12.00 INCH MAINS
BLUE ON 16.00 INCH OR LARGER MAINS

NO PARKING SHALL BE PERMITTED AND/OR NO OBSTRUCTIONS SHALL BE PLACE OR CONSTRUCTED WITHIN FIFTEEN (15) FEET OF ANY FIRE HYDRANT OR FIRE DEPARTMENT CONNECTION, PUBLIC OR PRIVATE.

THE FIRE DEPARTMENT CONNECTION MUST BE LOCATED WITHIN ONE HUNDRED (100) FEET OF A FIRE HYDRANT AND WITHIN FIFTY (50) FEET OF A MINIMUM EIGHTEEN (18) FOOT WIDE PAVED DRIVEWAY OR STREET.

GAS METER, PROPANE TANKS, OVERHEAD ELECTRICAL SERVICE, AND TRANSFORMERS MUST NOT BE LOCATED ON THE SAME SIDE OF THE BUILDING OR STRUCTURE AS THE FIRE DEPARTMENT CONNECTION UNLESS A CLEAR DISTANCE OF ONE HUNDRED FIFTY (150) FEET CAN BE MAINTAINED BETWEEN UTILITIES AND THE FIRE DEPARTMENT CONNECTION.

ALL DRIVE AREAS MUST BE POSTED AS FIRE LANES WITH UNIFORM SIGNS IN KEEPING WITH THE STANDARD ESTABLISHED IN THE MICHIGAN MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES. SIGNS MUST BE ERECTED ON BOTH SIDES OF THE FIRE LANES WITH SPACING BETWEEN SIGNS NOT TO EXCEED ONE HUNDRED (100) FEET.

DESIGNATED EXIT DOORS ONTO DRIVES OR PARKING AREAS MUST BE PROTECTED WITH GUARD POSTS OR PARKING BLOCKS.

A WHITE HIGH VISIBILITY STRIPE SHALL BE PAINTED ON THE UPPER FLANGE OF ALL FIRE HYDRANTS.

LEGEND

Landscape Summary

Use of Native Plant Material
Required: 50% of the total trees and shrubs planted are native
Proposed: Final percentage to be determined during final site plan approval

Screening of Adjoining Uses
Required: Per Table 13.02-B in Article 13 of the Troy Zoning Ordinance, no screening is required between Use Group 1: Residential Uses, Use Group 2: Residential/Lodging Uses, and the surrounding land uses in these specific situations. See Plan for Zoning relationships

Parking Lot Landscape
Required: 1 Tree / 8 Parking Spaces
Proposed: 81 spaces
Required: 11 Trees
Provided: 11 Trees

Greenbelts along Public Streets
Required: 10' Greenbelt along public street right-of-ways
1 Tree / 30 LF

E. Long Lake Road
Length of Frontage: 684.03 LF
Required: 10' Greenbelt & 23 Trees
Provided: 10' Greenbelt & 10 Trees

Rochester Road
Length of Frontage: 80.00 LF
Required: 10' Greenbelt & 3 Trees
Provided: 10' Greenbelt & 3 Trees

Internal Street Trees
Required: 1 Tree / 50 LF of internal public & private streets
Road Length: 4,901.44 LF
Required: 98 Trees
Proposed: 98 Trees

R.O.W. Screening
Required: Screening Alternative 2 when site abuts a R.O.W. of 120' or 150'
Required: 1 Large Evergreen / 10 LF of frontage
Length of Frontage: 684.03 LF
Required: 68 Trees
Provided: 48 Trees

Tree Replacement Summary

Total Trees Surveyed: 658
- Total Trees Offsite: 26

Total Onsite Trees: 632
- Total Landmark Trees: 10

Total Trees Saved: 8
- Total Landmark Trees: 0

Total Trees Removed: 624
- Exempt Trees: 560 (These trees include prohibited species & Poor Quality)
- Total Woodland DBH Removed: 640.60"
- Total Landmark DBH Removed: 232.30"

Replacement Requirements:
Required: 100% Landmark DBH + 50% Woodland DBH
Required Replacement DBH Total: 552.60" (185 - 3" trees or equivalent)
Proposed Replacement DBH Total: 555.00" (185 - 3" trees or equivalent)

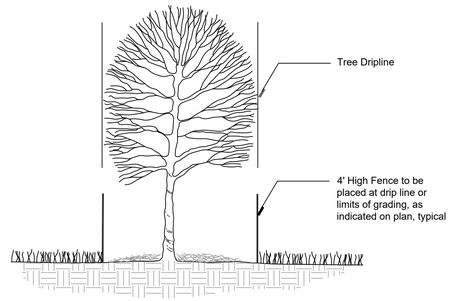
Tree Protection Detail - Plan

Scale: NTS



Tree Protection Detail - Section

Scale: NTS

Tree Protection Notes

1. Approved tree protection shall be erected prior to the start of construction activities, and shall remain in place until construction is complete.
2. No person may conduct any activity within the drip line, or protected area, of any designated tree to remain, including, but not limited to, placing solvents, building materials, construction equipment, etc.
3. Grade changes may not occur within the drip line of protected trees.
4. During construction, no person shall attach any device or wire to any remaining tree.
5. All utility service requests must include notification to the installer that protected trees must be avoided. All trenching shall occur outside of the protective fencing.
6. Swales shall be routed to avoid the area within the drip lines of protected trees.
7. Trees located on adjacent properties that may be affected by construction activities must be protected.
8. Trees to be removed shall be flagged by the Owner Representative prior to site grading.
9. Root zones of protected trees should be well marked with bright colors and surrounded with rigidly staked fencing.
10. The parking of idle and running equipment shall be prohibited under the drip line of protected trees.
11. The stripping of topsoil from around protected trees shall be prohibited.
12. Trees to be removed shall be fell away from trees to be saved.
13. Grubbing of understory vegetation in construction areas should be cleared by cutting vegetation at ground level with a chain saw or minimally with a hydro-axe.
14. The Landscape Architect shall be notified immediately if any protected tree is damaged or removed.

Notes

Tree Survey prepared by Barr Engineering Company on March 26, 2021
(1) Condition as per ISA Health Ratings, 9th Edition.
(2) Landmark as per City of Troy Zoning Ordinance, Section 13.07 Woodland Protection (C)(1)

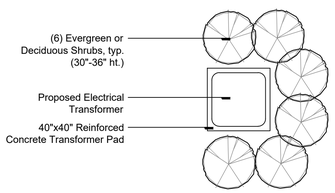
INSTALLATION NOTES:

1. DIG PLANT POCKET 12" WIDER THAN EDGE OF ROOTBALL.
2. THOROUGHLY COMPACT BOTTOM OF PLANT POCKET.
3. REMOVE ALL TWINE FROM TOP OF ROOTBALL. EXAMINE TRUNK COLLAR & REMOVE EXCESS SOIL FROM TOP OF ROOTBALL DOWN TO THE UPPER LEVEL OF THE ROOT SYSTEM. SET ROOTBALL WITH TOP 1/8 OF BALL ABOVE FINISH GRADE.
4. PLACE BACKFILL UNDER & ALONGSIDE BASE OF BALL TO STRAIGHTEN TREE. THOROUGHLY COMPACT TO FILL ALL VOIDS.
5. BACKFILL PLANT POCKET 1/3 WITH PLANTING MIX CONSISTING OF 50 % TOPSOIL & 50 % NATIVE SOIL & COMPACT THOROUGHLY, ASSURING TREE IS STILL STRAIGHT.
6. BEFORE CONTINUING WITH BACKFILL, REMOVE TOP WIRE LOOPS, OR BEND DOWN UNTIL THEY TOUCH SIDE OF BALL. REMOVE EXCESS BURLAP.
7. BACKFILL PLANT POCKET SECOND 1/3 WITH PLANTING MIX & COMPACT THOROUGHLY, ASSURING TREE IS STILL STRAIGHT.
8. BACKFILL PLANT POCKET LAST 1/3 WITH PLANTING MIX & COMPACT THOROUGHLY, ASSURING TREE IS STILL STRAIGHT. SLOPE GRADE AWAY FROM TREE.
9. IF PLANTED IN NON-IRRIGATED AREAS, FORM A SAUCER WITH SOIL AT OUTSIDE EDGE OF ROOTBALL.
10. SHREDDED BARK MULCH, 3" DEPTH. MULCH TO BE NATURAL IN COLOR. LEAVE 2-3" RING EXPOSED AT BASE OF TRUNK.
11. MULCH RINGS TO BE CONSISTENT WITH PLANT TYPE/SIZE THROUGHOUT PROJECT & SHOULD NOT EXTEND BEYOND PLANT POCKET.
12. MINIMUM 2"x2"x60" HARDWOOD STAKES TO EXTEND INTO UNDISTURBED SOIL UNDER PLANT POCKET. STAKE LOCATIONS PER TREE TO BE CONSISTENT THROUGHOUT PROJECT.
13. 1" WIDE BELT LIKE NYLON, PLASTIC, OR OTHER ACCEPTABLE MATERIAL, NO WIRE OR HOSE TO BE USE TO GUY TREES. TWO (2) GUYS PER TREE.

Deciduous Tree Planting Detail - 4" Cal. and Under

©2022 LANDSCAPE MANAGEMENT SOLUTIONS

Scale: NTS



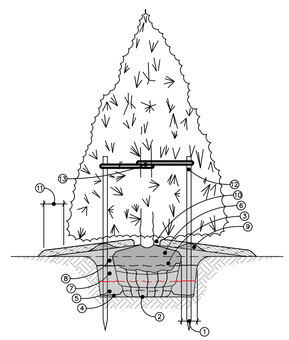
*Notes:
- Transformer Pad shall be screened on a minimum of three sides
- Actual Pad and Plant Locations shall be determined in the field, based on actual construction, orientation, and desired screening

Optional Transformer Screening Detail

Scale: ¼" = 1'

Landscape Notes

1. All plant material shall be true to name and free from physical damage and wind burn.
2. Plants shall be full, well-branched, and in a healthy, vigorous growing condition.
3. Plants shall be watered before and after planting is complete.
4. All trees must be staked, fertilized, and mulched and shall be guaranteed to exhibit a normal growth cycle for at least one (1) full year following planting.
5. All material shall conform to the guidelines established in the most recent edition of the American Standard for Nursery Stock.
6. Provide clean backfill soil, using material stockpiled on site. Soil shall be screened and free of any debris, foreign material, or stone.
7. "Agriform" tabs or similar slow-release fertilizer shall be added to the planting pits before being backfilled.
8. Amended planting mix shall consist of 1/3 screened topsoil, 1/3 sand, and 1/3 peat.
9. All plantings shall be mulched with shredded hardwood bark, spread to a minimum depth of 3". Mulch is to be free from debris and foreign material and shall contain no pieces of inconsistent size.
10. The Landscape Contractor shall be responsible for all work shown on the landscape drawings and specifications.
11. No substitutions or changes of location, or plant types shall be made without the approval of the Landscape Architect or Owner's representative.
12. The Landscape Architect shall be notified of any discrepancies between the plans and field conditions prior to installation.
13. The Landscape Contractor shall be responsible for maintaining all plant material in a vertical condition throughout the guaranteed period.
14. The Landscape Architect shall have the right at any stage of the installation to reject any work or material that does not meet the requirements of the plane and specifications, if requested by the owner.
15. The Contractor shall be responsible for checking plant quantities to ensure quantities on drawings and plant list are the same. In the event of a discrepancy, the quantities on the plans shall prevail.
16. The Landscape Contractor shall seed and mulch or sod (as indicated on plans) all areas disturbed during construction, throughout the contract limits.
17. A pre-emergent weed control agent, "Preen" or equal, shall be applied uniformly to all planting beds prior to mulching.
18. All lawn areas to be irrigated.
19. The Developer and Landscape Architect reserve the right to change location of plant material and alter plant species/variety at the time of installation based upon availability and quantity of material as well as site conditions. Materials will be of similar size, appearance and growth habit.
20. All Lawn areas shall be Seeded or Sodded
21. All Landscape Areas shall be irrigated by an automatic irrigation system with separate zones for Lawn and Plants.



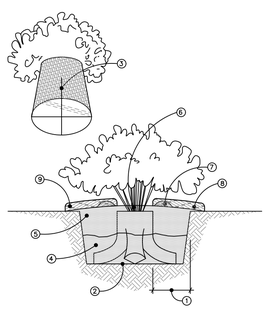
INSTALLATION NOTES:

1. DIG PLANT POCKET 12" WIDER THAN EDGE OF ROOTBALL.
2. THOROUGHLY COMPACT BOTTOM OF PLANT POCKET.
3. REMOVE ALL TWINE FROM TOP OF ROOTBALL. EXAMINE TRUNK COLLAR & REMOVE EXCESS SOIL FROM TOP OF ROOTBALL DOWN TO THE UPPER LEVEL OF THE ROOT SYSTEM. SET ROOTBALL WITH TOP 1/8 OF BALL ABOVE FINISH GRADE.
4. PLACE BACKFILL UNDER & ALONGSIDE BASE OF BALL TO STRAIGHTEN TREE. THOROUGHLY COMPACT TO FILL ALL VOIDS.
5. BACKFILL PLANT POCKET 1/3 WITH PLANTING MIX CONSISTING OF 50 % TOPSOIL & 50 % NATIVE SOIL & COMPACT THOROUGHLY, ASSURING TREE IS STILL STRAIGHT.
6. BEFORE CONTINUING WITH BACKFILL, REMOVE TOP WIRE LOOPS, OR BEND DOWN UNTIL THEY TOUCH SIDE OF BALL. REMOVE EXCESS BURLAP.
7. BACKFILL PLANT POCKET SECOND 1/3 WITH PLANTING MIX & COMPACT THOROUGHLY, ASSURING TREE IS STILL STRAIGHT.
8. BACKFILL PLANT POCKET LAST 1/3 WITH PLANTING MIX & COMPACT THOROUGHLY, ASSURING TREE IS STILL STRAIGHT. SLOPE GRADE AWAY FROM TREE.
9. IF PLANTED IN NON-IRRIGATED AREAS, FORM A SAUCER WITH SOIL AT OUTSIDE EDGE OF ROOTBALL.
10. SHREDDED BARK MULCH, 3" DEPTH. MULCH TO BE NATURAL IN COLOR. LEAVE 2-3" RING EXPOSED AT BASE OF TRUNK.
11. MULCH RINGS TO BE CONSISTENT WITH PLANT TYPE/SIZE THROUGHOUT PROJECT & SHOULD EXTEND 6" BEYOND LOWEST BRANCH OF EVERGREEN TREES.
12. MINIMUM 2"x2"x60" HARDWOOD STAKES TO EXTEND INTO UNDISTURBED SOIL UNDER PLANT POCKET. STAKE LOCATIONS PER TREE TO BE CONSISTENT THROUGHOUT PROJECT.
13. 1" WIDE BELT LIKE NYLON, PLASTIC, OR OTHER ACCEPTABLE MATERIAL, NO WIRE OR HOSE TO BE USE TO GUY TREES. TWO (2) GUYS PER TREE.

Evergreen Tree Planting Detail - 10' Ht. and Under

©2022 LANDSCAPE MANAGEMENT SOLUTIONS

Scale: NTS



INSTALLATION NOTES:

1. DIG PLANT POCKET 6" WIDER THAN EDGE OF ROOTBALL.
2. THOROUGHLY COMPACT BOTTOM OF PLANT POCKET.
3. REMOVE PLANT FROM CONTAINER AND EXAMINE ROOTMASS. IF ROOTMASS IS LOOSE, INTEGRATE PLANT ROOTS & POTTING MEDIA WITH PLANTING MIX. IF A ROOTBOUND CONDITIONS EXISTS, DISRUPT THE ROOTMASS BY CUTTING THROUGH BOTTOM HALF OF ROOTMASS. ROTATE ROOTMASS 90° AND CUT AGAIN, FORMING FOUR (4) LOBES. SPREAD THE FOUR LOBES DISTRUPTING ROOTMASS AND INTEGRATE PLANT ROOTS & POTTING MEADIA WITH PLANTING MIX. PLACE PLANT IN POCKET SLIGHTLY ABOVE GRADE.
4. BACKFILL PLANT POCKET 1/2 WITH PLANTING MIX CONSISTING OF 50 % TOPSOIL & 50 % NATIVE SOIL, ASSURING SHRUB IS STRAIGHT.
5. BACK FILL REMAINING 1/2 OF PLANT POCKET WITH PLANTING MIX & COMPACT THOROUGHLY, ASSURING SHRUB IS STILL STRAIGHT.
6. SPREAD 1" OF PLANTING MIX OVER TOP OF CONTAINER ROOTBALL. SLOPE GRADE AWAY FROM SHRUB.
7. IF PLANTED IN NON-IRRIGATED AREAS, FORM A SAUCER WITH SOIL AT OUTSIDE EDGE OF ROOTBALL.
8. SHREDDED BARK MULCH, 3" DEPTH. MULCH TO BE NATURAL IN COLOR. LEAVE 1-2" RING EXPOSED AT BASE OF PLANT.
9. IF NOT PLANTED WITHIN A LANDSCAPE BED, MULCH RINGS TO BE CONSISTENT IN SIZE WITH PLANT TYPE/SIZE THROUGHOUT PROJECT.

Shrub Planting Detail - Container

Scale: NTS

Landscape Maintenance Notes

All Landscape Maintenance shall be performed by Owner or Owner's desired Landscape Contractor or Landscape Maintenance Company.

Overall
- **All diseased, damaged, or dead materials shall be replaced in accordance with the standards of the City of Troy Zoning Ordinance.**

Lawn & Turf
- **Lawn shall not be irrigated the prior to scheduled mowing**
- **Maintain a lawn height or 2-1/2" to 3-1/2"**
- **Lawn shall be mowed with a mulching mower or mower affixed with a mulching blade. Grass clippings shall be left on the lawn to decompose and release nutrients back into the soil**
- **Inspect Irrigation system after mowing to ensure no damage has been done to the components**
- **Maintenance Contractor shall maintain clean equipment to prevent potential spread of unwanted seeds, pests, and pathogens**

Shrubs
- **Prune shrubs on an as-needed basis and only to maintain the plant's natural appearance**
- **Allow shrubs to mature and fill planting areas as designed**
- **Allow designed hedges to grow together prior to pruning into a uniform shape**

Groundcovers
- **Keep free of weeds, grass, and refuse**
- **Prune lightly to maintain natural appearance**
- **Allow groundcovers to fill the intended planting area**

Perennials
- **Prune dead flower stalks that emerge during the summer to encourage foliage growth**
- **Perform seasonal pruning, weeding, and dead-heading as necessary to maintain a neat appearance and encourage flowering**

Trees
- **Remove weeds and suckers from around the base of trees**
- **Prune trees for safety, health, or structural clearance. Remove crossing and damaged branches**
- **Do not top trees for any reason**
- **Check on tree staking on a regular basis to ensure that ties and stakes are not damaging the trees. Maintain tree stakes until the tree can stand on its own. Upon reaching this point, remove and properly dispose of all tree stakes, ties, and wiring**

Mulch
- **Maintain hardwood mulch at a 3" depth and replenish as needed**
- **Keep mulch at least 3" away from plant stems and tree trunks**
- **Maintain clean-cut mulch edges and tree rings that match the designed edges**

Weed Management
- **Remove and properly dispose of any weeds and tree suckers that appear in planting beds. Use the least destructive methods possible**

Fertilization
When fertilizing, use organic or non-chemical alternatives whenever possible to reduce the runoff into the Paint Creek

Pest Control
- **When using pesticides, use organic or non-chemical alternatives whenever possible to reduce the runoff into the Paint Creek**

Bed Edging
- **Maintain Spade Cut Edges as designed, as necessary**

Plan View
Scale - 1" = 60ft

General Note

1. LUMINAIRE MOUNTING HEIGHT 8' - 0"
2. CALCULATIONS ARE SHOWN IN FOOTCANDLES AT: 0' - 0"
3. LIGHTING ALTERNATES REQUIRE NEW PHOTOMETRIC CALCULATION AND RESUBMISSION TO CITY FOR APPROVAL.

THE ENGINEER AND/OR ARCHITECT MUST DETERMINE APPLICABILITY OF THE LAYOUT TO EXISTING / FUTURE FIELD CONDITIONS. THIS LIGHTING LAYOUT REPRESENTS ILLUMINATION LEVELS CALCULATED FROM LABORATORY DATA TAKEN UNDER CONTROLLED CONDITIONS IN ACCORDANCE WITH ILLUMINATING ENGINEERING SOCIETY APPROVED METHODS. ACTUAL PERFORMANCE OF ANY MANUFACTURER'S LUMINAIRE MAY VARY DUE TO VARIATION IN ELECTRICAL VOLTAGE, TOLERANCE IN LAMPS, AND OTHER VARIABLE FIELD CONDITIONS. MOUNTING HEIGHTS INDICATED ARE FROM GRADE AND/OR FLOOR UP.

THESE LIGHTING CALCULATIONS ARE NOT A SUBSTITUTE FOR INDEPENDENT ENGINEERING ANALYSIS OF LIGHTING SYSTEM SUITABILITY AND SAFETY. THE ENGINEER AND/OR ARCHITECT IS RESPONSIBLE TO REVIEW FOR MICHIGAN ENERGY CODE AND LIGHTING QUALITY COMPLIANCE.

UNLESS EXEMPT, PROJECT MUST COMPLY WITH LIGHTING CONTROLS REQUIRMENTS DEFINED IN ASHRAE 90.1 2013. FOR SPECIFIC INFORMATION CONTACT GBA CONTROLS GROUP AT ASG@GASSERBUSH.COM OR 734-266-6705.

FOR ORDERING INQUIRIES CONTACT GASSER BUSH AT QUOTES@GASSERBUSH.COM OR 734-266-6705.

THIS DRAWING WAS GENERATED FROM AN ELECTRONIC IMAGE FOR ESTIMATION PURPOSE ONLY. LAYOUT TO BE VERIFIED IN FIELD BY OTHERS.

MOUNTING HEIGHT IS MEASURED FROM GRADE TO FACE OF FIXTURE. POLE HEIGHT SHOULD BE CALCULATED AS THE MOUNTING HEIGHT LESS BASE HEIGHT.

FOUNDATION NOTES

NOTE:
ALL FOOTINGS ARE DESIGNED FOR 3000 P.S.F. SOIL BRG. CAPACITY & 30 P.S.F. ROOF SNOW LOAD. FOR VARYING CONDITIONS REFER TO TABLE R403.1(1), R403.1(2), & R403.1(3) OF THE 2015 IRC.

1. ALL COLUMNS SHOWN SHALL BE 3" DIA. SCHEDULE 40 STANDARD STEEL PIPE COLUMN ON 30" X 30" X 18" DEEP CONC. FTG. TOP OF CONCRETE FTG. TO BE 4" BELOW FINISH BASEMENT SLAB. (TYPICAL UNLESS NOTED OTHERWISE)
2. WHERE STEEL BEAMS REST ON FOUNDATION WALLS, SIZE BEAM POCKET APPROPRIATELY AND SHIM AS REQUIRED.
3. VERIFY ALL UTILITY LOCATIONS W/ BUILDER.
4. PROVIDE LADDERING UNDER ANY WALL RUNNING PARALLEL W/ JOIST THAT DOES NOT LAND DIRECTLY ON A JOIST
5. PROVIDE SQUASH BLOCKS UNDER ALL BEARING CONDITIONS.
6. GROUT SOLID @ BEARING CONDITIONS WHERE BLOCK IS USED.
7. PROVIDE 2" X 24" (MIN. R-10) RIGID PERIMETER INSULATION AT ALL BASEMENT SLABS THAT ARE LESS THAN 42" BELOW EXTERIOR FINISHED GRADE
8. GAS LINES SHALL RUN UNDER SLAB

NOTE:
PROVIDE MIN. (2) 2 X 4 HEADER AT ALL INTERIOR & EXTERIOR DOOR & WINDOW OPENINGS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JACK STUD & (1) KING STUD AT EACH END OF ALL HEADERS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JOIST OR LADDER FRAMING UNDER ALL UPPER FLOOR PARALLEL PARTITIONS

NOTE:
GROUT ALL CONCRETE BLOCK CORES SOLID THAT SUPPORT POINT LOADS FROM ABOVE (TYPICAL)

A-1

PLAN NOTES

INTERIOR WALLS:
1/2" GYPSUM WALL BOARD ON EACH SIDE OF 2x4 WOOD STUDS @ 16" O.C. 3 1/2" THICK TYPICAL (UNLESS NOTED OTHERWISE). ALL DIMENSION TAKEN FROM STUD EDGES

EXTERIOR WALLS:
SIDING WITH AIRSPACE, MOISTURE BARRIER PAPER (HOUSE WRAP) ON 7/16" O.S.B. SHEATHING ON 2X4 WOOD STUDS @ 16" O.C. OR AS NOTED, MIN. R-13 WALL CONSTRUCTION. 1/2" GYPSUM WALL BOARD (SLUE 4 SCREED). WALL TO BE 4" THICK WITH SIDING (TYPICAL UNLESS NOTED OTHERWISE). ALL DIMENSION TAKEN FROM FRAMING (FLOOR PLANS) OR FOUNDATION CORNERS (FOUNDATION PLAN)

1. OPENINGS BETWEEN THE GARAGE AND RESIDENCE SHALL BE EQUIPPED WITH 20-MINUTE FIRE RATED DOORS (OR EQUIVALENT PER 2015 MRC SECTION R302.5.1).
2. VENT ALL EXHAUST FANS TO EXTERIOR.
3. WHEN POSSIBLE DIRECT ALL FLUES AND VENTS THAT PENETRATE ROOF BEHIND MAIN RIDGE.
4. INSTALL WATER SUPPLY AND DRAIN BOX (GREY BOX) AT WASHING MACHINE LOCATION.
5. USE MOISTURE RESISTANT DRYWALL AT ALL AREAS SUSCEPTIBLE TO MOISTURE.
6. ALL FIRST FLOOR INTERIOR DOORS TO BE FRAMED 8'-0" TALL, ALL SECOND FLOOR INTERIOR DOORS TO BE FRAMED 8'-8" UNLESS NOTED OTHERWISE. VERIFY W/ BUILDER
7. PROVIDE GUARDRAIL AT STAIRS DURING CONSTRUCTION.
8. PROVIDE SQUASH BLOCKS UNDER ALL BEARING CONDITIONS.
9. GARAGE WALLS TO BE 2X6 STUDS IF OVER 10'-0" TALL.
10. PIPING INSTALLED DOWNSTREAM OF THE POINT OF DELIVERY SHALL NOT EXTEND THROUGH ANY TOWNHOUSE UNIT OTHER THAN UNIT SERVED PER SECTION G2415.3

NOTE:
PORCH CLG. FINISH PER BUILDER'S SPEC.

NOTE:
PROVIDE MIN. (2) 2 X 4 HEADER AT ALL INTERIOR & EXTERIOR DOOR & WINDOW OPENINGS (UNLESS NOTED OTHERWISE).

NOTE: S.D. ⊙ SD/C ◉
ALL SMOKE & CARBON MONOXIDE DETECTORS INTERCONNECTED W/ BATTERY BACK-UP PER CODE.

NOTE:
PROVIDE MIN. (1) JACK STUD & (1) KING STUD AT EACH END OF ALL HEADERS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JOIST OR LADDER FRAMING UNDER ALL UPPER FLOOR PARALLEL PARTITIONS

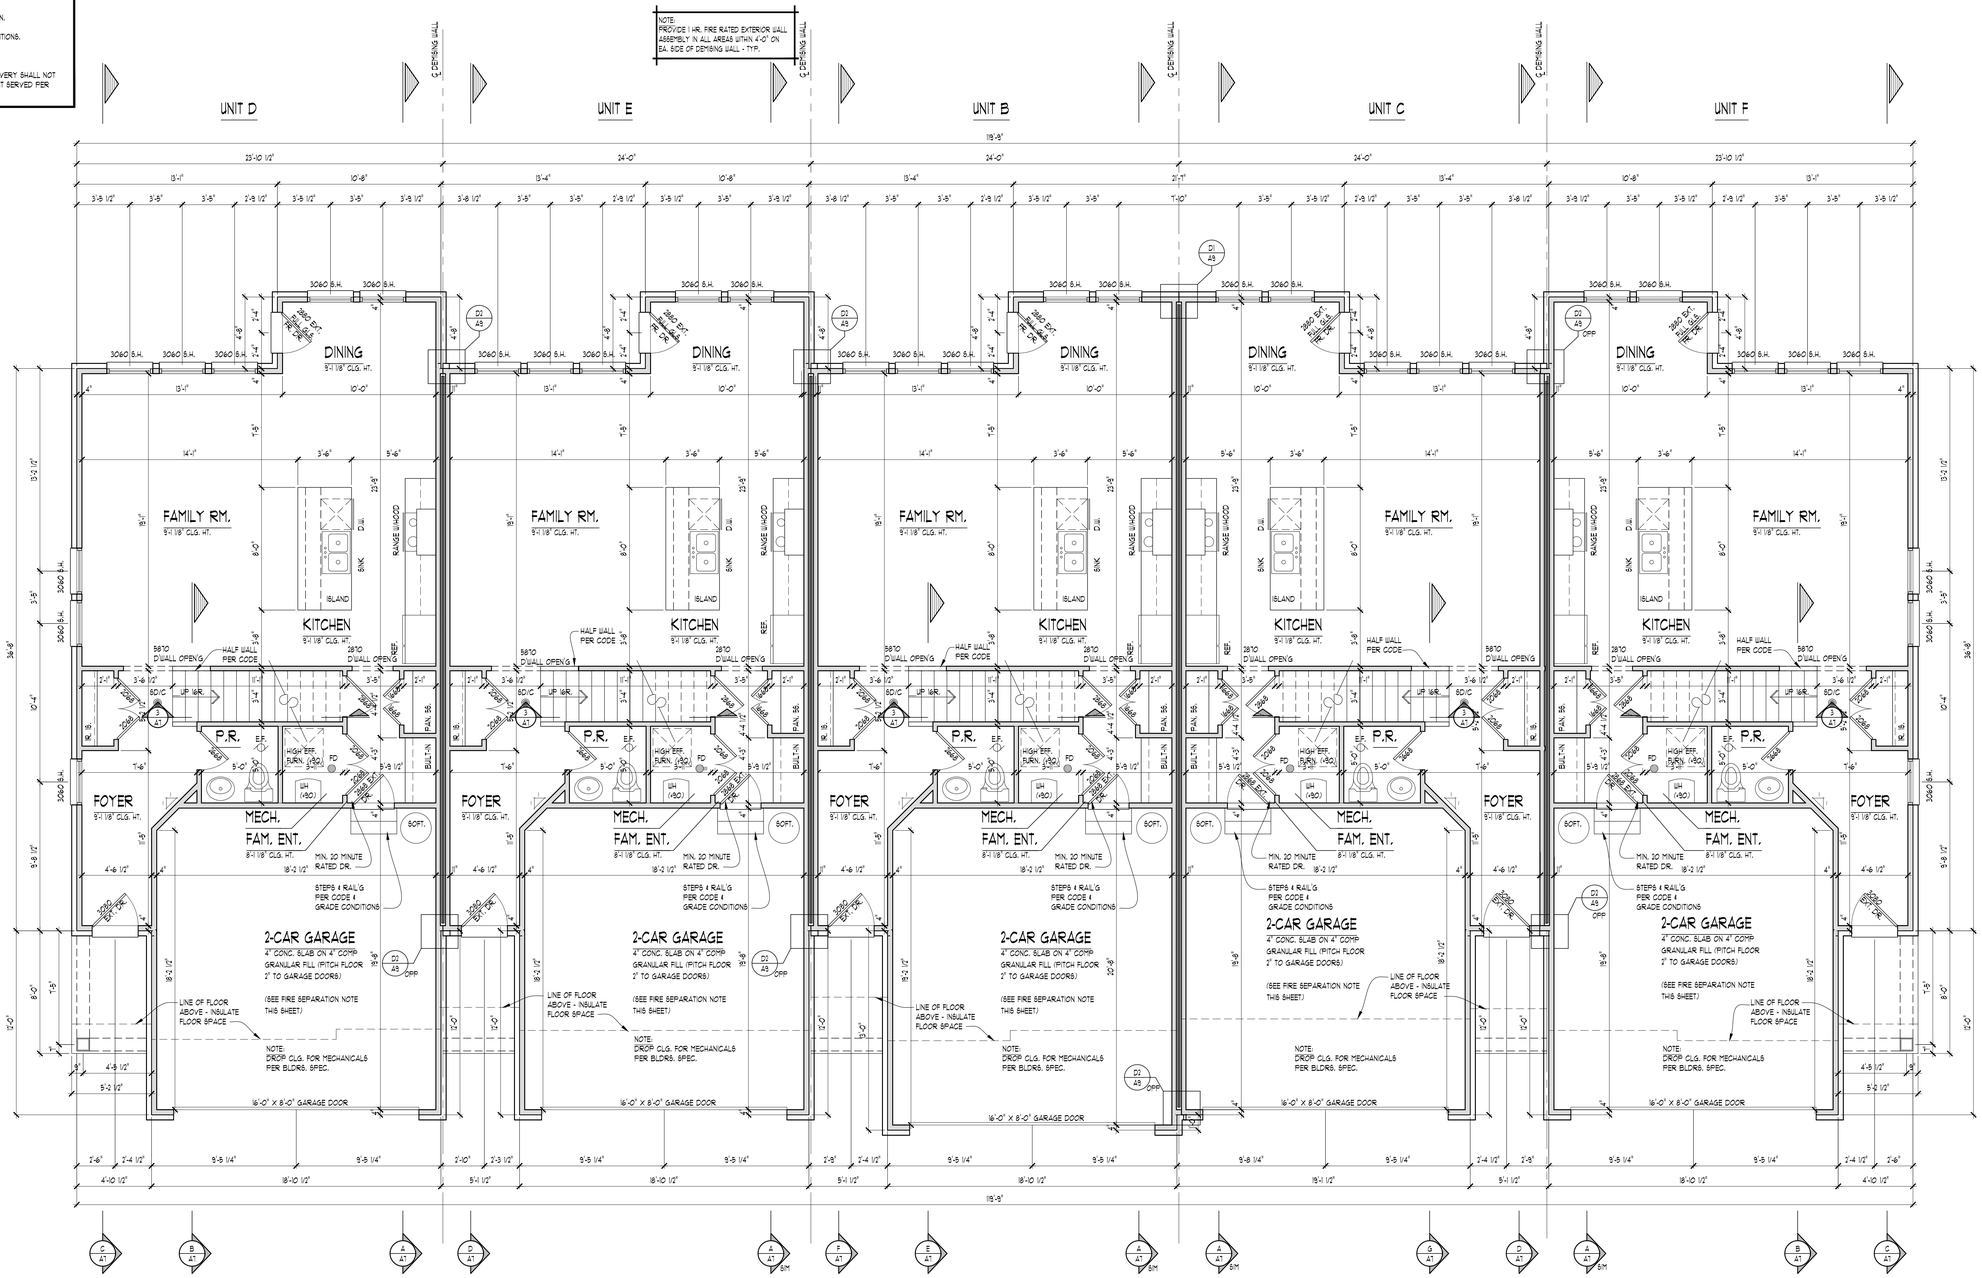
NOTE:
DOOR & WINDOW LOCATIONS:

ALL DOORS & WINDOWS ARE ASSUMED TO BE EITHER IN THE CENTER OF THE WALL MASS OR MIN. 4 INCHES FROM PERPENDICULAR WALL FOR CASING UNLESS NOTED OTHERWISE

FIRE SEPARATION NOTE

FIRE SEPARATION (R302.6)
GARAGE SPACE BENEATH HABITABLE ROOMS SHALL BE SEPARATED FROM ALL HABITABLE ROOMS ABOVE BY NOT LESS THAN 5/8-INCH TYPE X GYPSUM BOARD OR EQUIVALENT. WHERE THE SEPARATION IS A FLOOR-CEILING ASSEMBLY, THE STRUCTURE SUPPORTING THE SEPARATION SHALL ALSO BE PROTECTED BY NOT LESS THAN 1/2-INCH GYPSUM BOARD OR EQUIVALENT. ALL OTHER GARAGE SPACE SHALL BE SEPARATED FROM THE RESIDENCE AND ITS ATTIC AREA BY NOT LESS THAN 1/2-INCH GYPSUM BOARD APPLIED TO THE GARAGE SIDE. (FROM CLG. UNDER FLR. ABV. (ENCLOSE MECHANICAL AND STRUCTURAL ELEMENTS) VERIFY W/ BLDR.

NOTE:
PROVIDE 1 HR. FIRE RATED EXTERIOR WALL ASSEMBLY IN ALL AREAS WITHIN 4'-0" ON EA. SIDE OF DEMISING WALL - TYP.



FIRST FLOOR PLAN

SCALE: 1/4" = 1'-0"

NOTE:
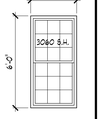
ALL CASEMENT VENTING TO BE VERIFIED W/ BUILDER/ HOMEOWNER PRIOR TO ORDERING WINDOWS

NOTE:
WINDOW MANUFACTURER TO VERIFY ALL WINDOW GRID PATTERNS WITH HOME OWNER.



NOTE:
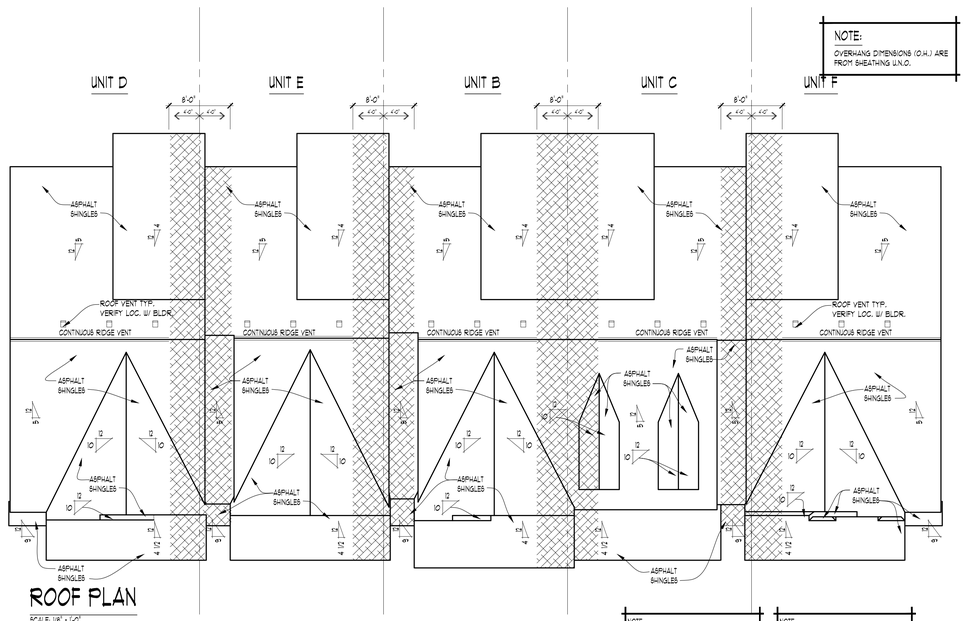
OVERHANG DIMENSIONS (O.H.) ARE FROM SHEATHING U.N.O.

NOTE:
ALL WINDOW SILLS OVER 8'-0" ABOVE EXTERIOR GRADE OR SURFACE BELOW TO BE MINIMUM 24" ABOVE FINISHED FLOOR OR HAVE SASH LIMITERS PER CODE REQUIREMENTS



ROOF PLAN

SCALE: 1/8" = 1'-0"

NOTE:
PROVIDE 1 HR. FIRE RATED EXTERIOR WALL ASSEMBLY IN ALL AREAS WITHIN 4'-0" ON EA. SIDE OF DEMISING WALL - TYP.

PROVIDE FIRE RETARDANT ROOF SHEATHING WITHIN 4'-0" ON EA. SIDE OF DEMISING WALL - TYP.

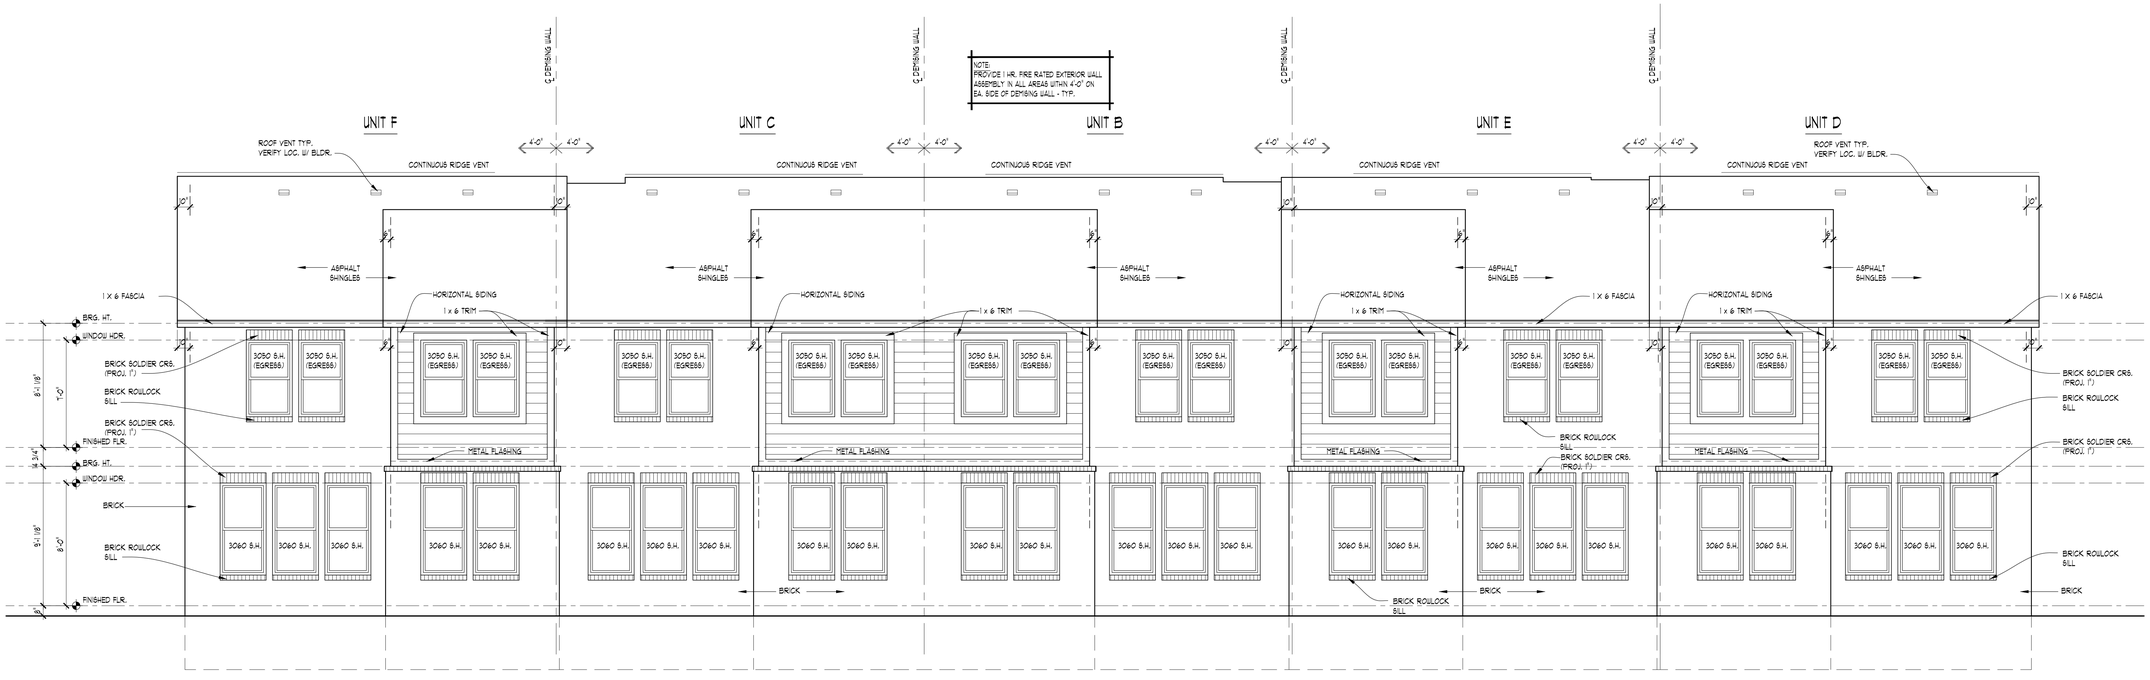
NOTE:
DO NOT INSTALL ANY ROOF VENTILATION WITHIN 8'-0" OF DIMENSION WALL/FIRE RATED SHEATHING

DO NOT INSTALL ANY SOFFIT VENTILATION WITHIN 4'-0" OF EA. SIDE OF DIMENSION WALL

ATTIC VENTILATION CALCULATIONS:

AREA OF ATTIC OVER HEATED SPACE = 5047 SQ. FT.
5047/150 = 34.9 (SQ. FT. REQ'D.)
34.9 X 144" = 5026" (SQ. INCH CONVERSION)
RIDGE VENTING:
5026" X 0.45 = 2262" (SQ. INCHES REQ'D.)
2262" / 18 = 126' (LINEAR FT. OF RIDGE VENT REQ'D.)
EAVE OR CORNICE VENTING:
5026" X 0.55 = 2764" (SQ. INCHES REQ'D.)

UNVENTABLE RIDGE:
126' - 8'T (AVAIL. RIDGE) = 39' (UNVENTABLE RIDGE)
39' X 18" = 702" (REMAINING SQ. INCHES)
702" / 9.0 = 14 (ROOF VENTS REQ'D.)



NOTE:
PROVIDE 1 HR. FIRE RATED EXTERIOR WALL ASSEMBLY IN ALL AREAS WITHIN 4'-0" ON EA. SIDE OF DEMISING WALL - TYP.

WALL TO BE 4" THICK WITH SIDING (TYPICAL UNLESS NOTED OTHERWISE). ALL DIMENSION TAKEN FROM FRAMING (FLOOR PLANS) OR FOUNDATION CORNERS (FOUNDATION PLAN)

1. OPENINGS BETWEEN THE GARAGE AND RESIDENCE SHALL BE EQUIPPED WITH 20-MINUTE FIRE RATED DOORS (OR EQUIVALENT PER 309 MRC SECTION R302.5.1)
2. VENT ALL EXHAUST FANS TO EXTERIOR.
3. WHEN POSSIBLE DIRECT ALL FLUES AND VENTS THAT PENETRATE ROOF BEHIND MAIN RIDGE.
4. INSTALL WATER SUPPLY AND DRAIN BOX (GREY BOX) AT WASHING MACHINE LOCATION.
5. USE MOISTURE RESISTANT DRYWALL AT ALL AREAS SUSCEPTIBLE TO MOISTURE.
6. ALL FIRST FLOOR INTERIOR DOORS TO BE FRAMED 8'-0" TALL ALL SECOND FLOOR INTERIOR DOORS TO BE FRAMED 6'-8" UNLESS NOTED OTHERWISE. VERIFY W/ BUILDER
7. PROVIDE GUARDRAIL AT STAIRS DURING CONSTRUCTION.
8. PROVIDE SQUASH BLOCKS UNDER ALL BEARING CONDITIONS.
9. GARAGE WALLS TO BE 2x6 STUDS IF OVER 10'-0" TALL.
10. PIPING INSTALLED DOWNSTREAM OF THE POINT OF DELIVERY SHALL NOT EXTEND THROUGH ANY TOWNHOUSE UNIT OTHER THAN UNIT SERVED PER SECTION G2418.3

NOTE:
PROVIDE MIN. (2) 2 X 4 HEADER AT ALL INTERIOR & EXTERIOR DOOR & WINDOW OPENINGS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JACK STUD & (1) KING STUD AT EACH END OF ALL HEADERS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JOIST OR LADDER FRAMING UNDER ALL UPPER FLOOR PARALLEL PARTITIONS

NOTE: S.D. ⊙ SD/C ◉
ALL SMOKE & CARBON MONOXIDE DETECTORS INTERCONNECTED W/ BATTERY BACK-UP PER CODE.

NOTE:
DOOR & WINDOW LOCATIONS:

ALL DOORS & WINDOWS ARE ASSUMED TO BE EITHER IN THE CENTER OF THE WALL MASS OR MIN. 4 INCHES FROM PERPENDICULAR WALL FOR CASING UNLESS NOTED OTHERWISE

NOTE:
PROVIDE 1 HR. FIRE RATED EXTERIOR WALL ASSEMBLY IN ALL AREAS WITHIN 4'-0" ON EA. SIDE OF DEMISING WALL - TYP.

PLAN NOTES

INTERIOR WALLS:
1/2" GYPSUM WALL BOARD ON EACH SIDE OF 2x4 WOOD STUDS @ 16" O.C. 3 1/2" THICK TYPICAL (UNLESS NOTED OTHERWISE). ALL DIMENSION TAKEN FROM STUD EDGES

EXTERIOR WALLS:
SIDING WITH AIRSPACE, MOISTURE BARRIER PAPER (HOUSE WRAP) ON 7/16" O.S.B. SHEATHING ON 2X4 WOOD STUDS @ 16" O.C. OR AS NOTED, MIN. R-13 WALL CONSTRUCTION, 1/2" GYPSUM WALL BOARD (GLUE & SCREW). WALL TO BE 4" THICK WITH SIDING (TYPICAL UNLESS NOTED OTHERWISE). ALL DIMENSION TAKEN FROM FRAMING (FLOOR PLANS) OR FOUNDATION CORNERS (FOUNDATION PLAN)

1. OPENINGS BETWEEN THE GARAGE AND RESIDENCE SHALL BE EQUIPPED WITH 20-MINUTE FIRE RATED DOORS (OR EQUIVALENT PER 309 MRC SECTION R302.5.1)
2. VENT ALL EXHAUST FANS TO EXTERIOR.
3. WHEN POSSIBLE DIRECT ALL FLUES AND VENTS THAT PENETRATE ROOF BEHIND MAIN RIDGE.
4. INSTALL WATER SUPPLY AND DRAIN BOX (GREY BOX) AT WASHING MACHINE LOCATION.
5. USE MOISTURE RESISTANT DRYWALL AT ALL AREAS SUSCEPTIBLE TO MOISTURE.
6. ALL FIRST FLOOR INTERIOR DOORS TO BE FRAMED 8'-0" TALL ALL SECOND FLOOR INTERIOR DOORS TO BE FRAMED 6'-8" UNLESS NOTED OTHERWISE. VERIFY W/ BUILDER
7. PROVIDE GUARDRAIL AT STAIRS DURING CONSTRUCTION.
8. PROVIDE SQUASH BLOCKS UNDER ALL BEARING CONDITIONS.
9. GARAGE WALLS TO BE 2x6 STUDS IF OVER 10'-0" TALL.
10. PIPING INSTALLED DOWNSTREAM OF THE POINT OF DELIVERY SHALL NOT EXTEND THROUGH ANY TOWNHOUSE UNIT OTHER THAN UNIT SERVED PER SECTION G2418.3

NOTE:
PROVIDE MIN. (2) 2 X 4 HEADER AT ALL INTERIOR & EXTERIOR DOOR & WINDOW OPENINGS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JACK STUD & (1) KING STUD AT EACH END OF ALL HEADERS (UNLESS NOTED OTHERWISE).

NOTE:
PROVIDE MIN. (1) JOIST OR LADDER FRAMING UNDER ALL UPPER FLOOR PARALLEL PARTITIONS

NOTE: S.D. ⊙ SD/C ◉
ALL SPOKE & CARBON MONOXIDE DETECTORS INTERCONNECTED W/ BATTERY BACK-UP PER CODE.

NOTE:
DOOR & WINDOW LOCATIONS:

ALL DOORS & WINDOWS ARE ASSUMED TO BE EITHER IN THE CENTER OF THE WALL MASS OR MIN. 4 INCHES FROM PERPENDICULAR WALL FOR CASING UNLESS NOTED OTHERWISE

WINDOW SILLS

IN DWELLING UNITS, WHERE THE OPENING OF AN OPERABLE WINDOW IS LOCATED MORE THAN 72" ABOVE FINISHED GRADE OR SURFACE BELOW, THE LOWEST PART OF THE CLEAR OPENING OF THE WINDOW SHALL BE A MINIMUM OF 24 INCHES ABOVE THE FINISHED FLOOR OF THE ROOM IN WHICH THE WINDOW IS LOCATED. GLAZING BETWEEN THE FLOOR AND 24" SHALL BE FIXED OR HAVE OPENINGS THROUGH WHICH A 4 INCH DIAMETER SPHERE CANNOT PASS. EXCEPTIONS:

1. WINDOWS WHOSE OPENINGS WILL NOT ALLOW A 4" DIA. SPHERE TO PASS THROUGH THE OPENING WHERE THE OPENING IS IN ITS LARGEST OPENED POSITION.
2. OPENINGS THAT ARE PROVIDED WITH WINDOW GUARDS THAT COMPLY WITH ASTM F 2006 OR F 2090.

OVERHANGS & DRAINAGE

PROVIDE GUTTERS & DOWNSPOUTS FOR DRAINAGE OF ROOF WATER. DOWNSPOUTS ARE TO BE LOCATED SO THAT THE DISCHARGE IS CONNECTED TO AN UDERGROUND STORM DRAINAGE SYSTEM PER SITE ENGINEER.

UNLESS NOTED OTHERWISE OVERHANG DIMENSIONS ARE 12" FROM FRAME. RAKE DIMENSIONS ARE 4" AT BRICK AND 6" AT SIDING.

STEEL LINTEL SCHEDULE

LOOSE STEEL LINTELS FOR MASONRY - EXTERIOR ANGLES FOR BRICK OR STONE (NO FLOOR LOAD)

MAX. CLEAR SPAN	LINTEL SIZE
5'-0" OR LESS	3 1/2" x 3 1/2" x 5/16"
7'-0" OR LESS	4" x 3 1/2" x 5/16"

FOUNDATION NOTES:

FOOTING SIZES ARE TO MEET THE MINIMUM SIZES AS PRESCRIBED IN THE 2015 MICHIGAN RESIDENTIAL CODE SECTION R403.

PER TABLES R403.1(1) AND R403.1(2) 3 STORY LIGHT FRAME BUILDING WITH OR WITHOUT MASONRY VENEER WITH A SLAB ON GRADE WILL ALLOW FOR A MINIMUM 12" WIDE FOOTING.

ALL NATURAL AND ENGINEERED SOILS ARE TO BE A MINIMUM OF 3000 PSF.

STRUCTURAL NOTES:

(2) 2x6 HEADERS TO BEAR ON (1) ONE JACK STUD UNLESS NOTED OTHERWISE.

(2) 2x10 & LARGER HEADERS TO BEAR ON (2) TWO JACK STUDS UNLESS NOTED OTHERWISE.

ALL PRE-ENGINEERED HEADERS FRAMED PERPENDICULAR TO WALL LINE SHALL BEAR ON REQUIRED NUMBER OF STUDS TO MATCH WIDTH OF HEADER MATERIAL.

ALL PRE-ENGINEERED HEADERS FRAMED PARALLEL TO WALL LINE SHALL BEAR ON A MINIMUM (2) TWO JACK STUDS UNLESS NOTED OTHERWISE.

ALL PRE-ENGINEERED LUMBER HEADERS SHALL BE BUILT-UP FROM THE NUMBER OF HEADERS INDICATED ON DRAWINGS. ALL MEMBERS SHALL BE SECURED WITH NAILS OR BOLTS AS SPECIFIED BY THE MANUFACTURER FOR SIZES INDICATED.

ALL GIRDER TRUSSES TO BEAR ON (2) TWO STUDS MINIMUM OR AS REQUIRED TO MATCH NUMBER OF TRUSS PLYS, WHICH EVER IS GREATER.

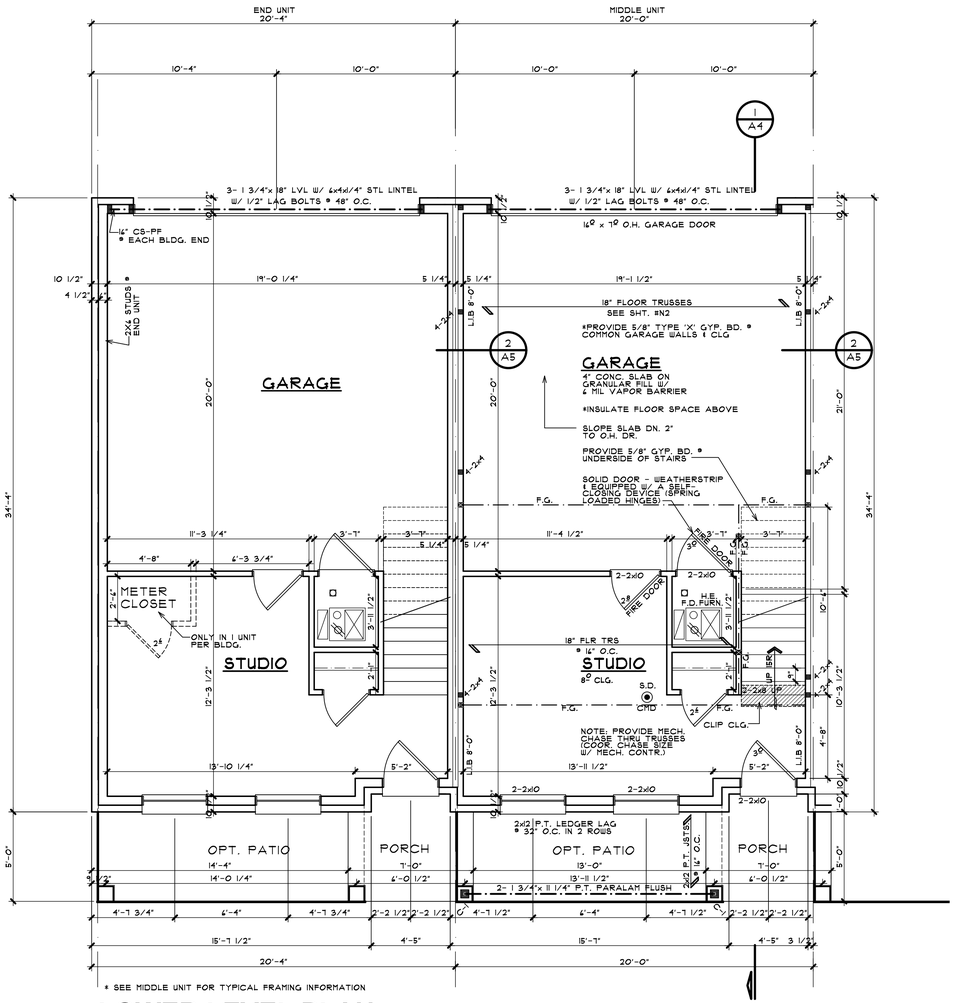
TRUSS FABRICATOR/CONTRACTOR TO PROVIDE ALL HANGERS W/ MODEL No. CLEARLY STAMPED & LAYOUT DRAWINGS CLEARLY INDICATING LOCATION OF VARIOUS HANGERS REQUIRED.

CARPENTER CONTRACTOR TO INSTALL NAIL SIZES & NUMBER REQ'D. AS SPECIFIED FOR EACH TYPE OF HANGER.

LVL DESIGN VALUES FOR MODULUS OF ELASTICITY (E) SHALL BE 2,000,000 PSI (2.0 E)

WALL DIMENSION NOTE:

ALL WALL DIMENSIONS ARE TO THE ROUGH. INTERIOR PARTITIONS ARE 3 1/2" (2x4) UNLESS NOTED OR DIMENSIONED OTHERWISE. EXTERIOR FRAME WALLS INCLUDE 1/2" NOMINAL DIMENSION FOR EXTERIOR SHEATHING. EXTERIOR FRAME WALLS ARE 6" (2x6) OR 4" (2x4) UNLESS NOTED OR DIMENSIONED OTHERWISE. "BRICK LEDGE" BRICK OR STONE EXTERIOR WITH AIR SPACE IS 4 1/2" UNLESS NOTED OR DIMENSIONED OTHERWISE.



* SEE MIDDLE UNIT FOR TYPICAL FRAMING INFORMATION

WINDOW SILLS

IN DWELLING UNITS, WHERE THE OPENING OF AN OPERABLE WINDOW IS LOCATED MORE THAN 72" ABOVE FINISHED GRADE OR SURFACE BELOW, THE LOWEST PART OF THE CLEAR OPENING OF THE WINDOW SHALL BE A MINIMUM OF 24 INCHES ABOVE THE FINISHED FLOOR OF THE ROOM IN WHICH THE WINDOW IS LOCATED. GLAZING BETWEEN THE FLOOR AND 24" SHALL BE FIXED OR HAVE OPENINGS THROUGH WHICH A 4 INCH DIAMETER SPHERE CANNOT PASS.
EXCEPTIONS:

1. WINDOWS WHOSE OPENINGS WILL NOT ALLOW A 4" DIA. SPHERE TO PASS THROUGH THE OPENING WHERE THE OPENING IS IN ITS LARGEST OPENED POSITION.
2. OPENINGS THAT ARE PROVIDED WITH WINDOW GUARDS THAT COMPLY WITH ASTM F 2006 OR F 2090.

OVERHANGS & DRAINAGE

PROVIDE GUTTERS & DOWNSPOUTS FOR DRAINAGE OF ROOF WATER. DOWNSPOUTS ARE TO BE LOCATED SO THAT THE DISCHARGE WILL NOT SPILL ON OR FLOW ACROSS ANY PORCHES, WALKS OR DRIVES.

UNLESS NOTED OTHERWISE OVERHANG DIMENSIONS ARE 12" FROM FRAME. RAKE DIMENSIONS ARE 4" AT BRICK AND 6" AT SIDING.

STEEL LINTEL SCHEDULE

LOOSE STEEL LINTELS FOR MASONRY - EXTERIOR ANGLES FOR BRICK OR STONE (NO FLOOR LOAD)

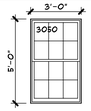
MAX. CLEAR SPAN	LINTEL SIZE
5'-0" OR LESS	3 1/2" x 3 1/2" x 5/16"
7'-0" OR LESS	4" x 3 1/2" x 5/16"
8'-0" OR LESS	5" x 3 1/2" x 5/16"
9'-0" OR LESS	5" x 3 1/2" x 3/8"
10'-0" OR LESS	6" x 3 1/2" x 3/8"

NOTE: THIS SCHEDULE APPLIES UNLESS NOTED OTHERWISE ON THE PLANS AND/OR ELEVATIONS.

NOTE: STEEL ANGLE LINTELS REQUIRE A SHOP COAT OF RUST-INHIBITIVE PAINT EXCEPT FOR LINTELS MADE OF CORROSION-RESISTANT STEEL.

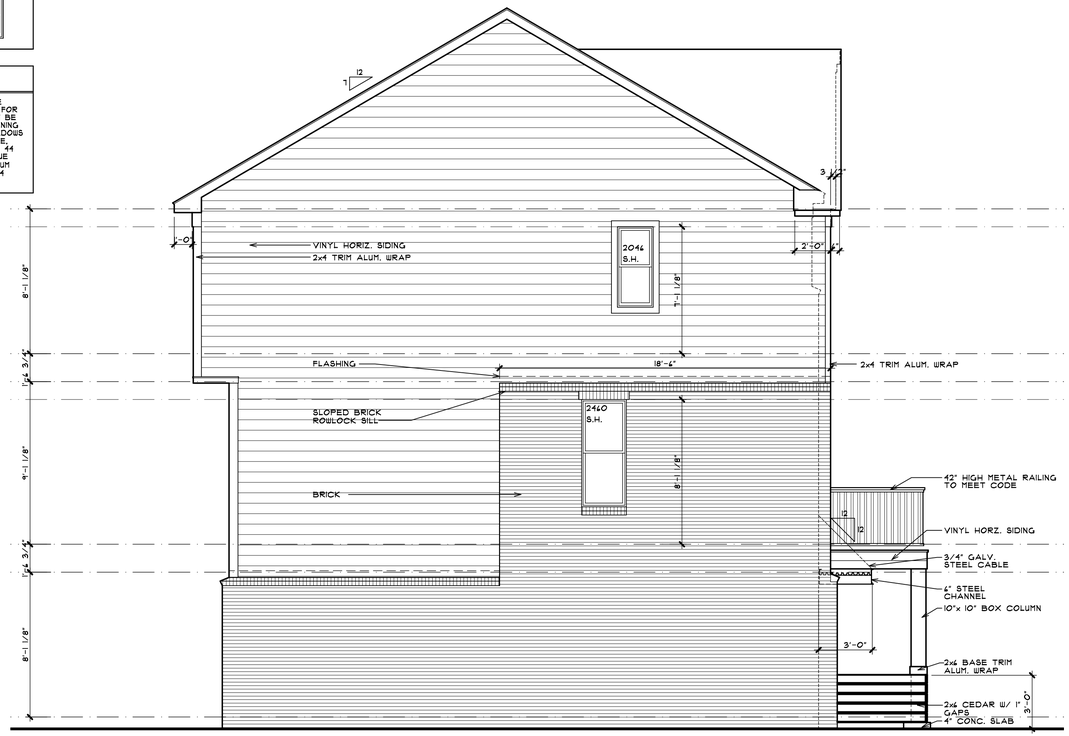
TYP. WINDOW DESIGNATION

GENERAL REFERENCE FOR ROUGH OPENING SIZES ONLY. CONSULT WITH WINDOW MANUFACTURER FOR EXACT WINDOW SIZES & REQUIREMENTS.



EGRESS WINDOW

EVERY SLEEPING ROOM SHALL HAVE AT LEAST ONE OPERABLE WINDOW OR EXTERIOR DOOR APPROVED FOR EMERGENCY EGRESS OR RESCUE. THE UNIT(S) MUST BE OPERABLE FROM THE INSIDE TO A FULL CLEAR OPENING WITHOUT THE USE OF SEPARATE TOOLS. WHERE WINDOWS ARE PROVIDED AS A MEANS OF EGRESS, OR RESCUE, THEY SHALL HAVE SILL HEIGHT OF NOT MORE THAN 44 INCHES ABOVE THE FLOOR. ALL EGRESS OR RESCUE WINDOWS FROM SLEEPING ROOMS MUST HAVE A MINIMUM NET CLEAR OPENING HEIGHT DIMENSION SHALL BE 24 INCHES AND WIDTH OF 20 INCHES.



SIDE ELEVATION

OPPOSITE HAND REVERSE
SCALE: 1/4" = 1'-0"

NOTE: HATCHED AREA INDICATES EITHER NON-COMB. ROOF SHEATHING WITHIN 4'-0" OF THE TENANT SEPARATION WALL OR ONE LAYER OF TYPE 'X' GYP. BD. ATTACHED TO THE UNDERSIDE OF TYP. ROOF SHEATHING WITHIN 4'-0" OF SEPARATION WALL.
- NO SOFFIT OR ROOF PENETRATIONS ARE ALLOWED IN THIS AREA

Remarks		Great location, well maintained Contemporary style condo is available to move right away! This beautiful condo was constructed around 2018. The subdivision is close to Rochester Road, minutes to I-75 and Big Beaver shopping area, Somerset Mall, etc. As a bonus, this is an end unit, and it has extra windows bringing in more light. Large balcony facing west. Wood flooring on the 1st level. The upgraded gourmet kitchen features quartz countertops, large island, stainless steel appliances. Second level	Freshly Painted, updated with all bells and whistles. This colonial crawl foundation house with 1671 SF has spacious Great Room, 4BR and 1.5 bath. It has been updated with newer kitchen appliances, Newer Roof, Furnace, and Water Heater. Close access to all shopping stores and Freeways. Kids in this neighborhood go to prestigious Troy School District. Meticulously maintained and this one won't last forever. Bring your clients and make an offer.

Bloomfield Hills, MI 48301-3159

RE: Wetland Delineation and Jurisdictional Assessment
Goodman Property
City of Troy, Oakland County, Michigan
ASTI File No. 11812

Dear Mr. Loughrin:

On March 24, 2021 ASTI Environmental (ASTI) conducted a site investigation to delineate wetland boundaries on approximately 20 acres of land located west of Rochester Road and south of E. Long Lake Road, City of Troy, Oakland County, Michigan (Property). One wetland (Wetland B) likely regulated by the Michigan Department of Environment, Great Lakes, and Energy (EGLE) and three wetlands (Wetland A, Wetland C, Wetland P) not likely regulated by EGLE were found on the Property (Figure 1 – *GPS-Surveyed Wetland Boundaries*). Wetland boundaries, as depicted on Figure 1, were located using a professional grade, hand-held Global Positioning System unit (GPS).

SUPPORTING DATA AND MAPPING

The USDA Web Soil Survey (WSS), the National Wetlands Inventory (NWI), the EGLE Wetlands Map Viewer web site, and digital aerial photographs were all used to support the wetland delineation and subsequent regulatory status determination. The NWI map showed no wetlands on the Property. The EGLE map identified wetlands throughout the western portion of the Property, and wetland soils throughout the western and central portions of the Property.

In addition, the WSS indicated the Property is comprised of the soils Lenawee silty clay loam (0-1% slopes), Metea loamy sand (0-6% slopes), Selfridge loamy sand (0-3% slopes), Owosso silty loam (1-6% slopes), Aquents (sandy, loamy, undulating), and Urban land. According to the WSS, Lenawee and Aquents are listed as hydric soils.

FINDINGS

ASTI investigated the Property for the presence of any lakes, ponds, wetlands, and watercourses. This work is based on *MCL 324 Part 301 (Inland Lakes and Streams)* and *Part 303 (Wetland Protection).*

It should be noted that some municipalities have local wetland ordinances and natural features setbacks that may apply to this property. In addition, in some circumstances the US Army Corps of Engineers (ACOE) may also have jurisdiction of wetlands or watercourses on your Property. This is not the case for your site.

The delineation protocol used by ASTI for this delineation is based on the US Army Corps of Engineers' *Wetland Delineation Manual,* 1987, the *Regional Supplement to the Corps of Engineer Wetland Delineation Manual: Northcentral and Northeast Region*, and related guidance/documents, as appropriate. Wetland vegetation, hydrology, and soils were used to locate the wetland boundaries. Four wetland areas were found on the Property and are discussed below.

Wetland A

Wetland A is a scrub-shrub wetland (see Figure 1) 0.61 acres in size. Dominant vegetation included green ash (*Fraxinus pennsylvanica*), and dogwood (*Cornus racemosa, Cornus amomum*). Soils were considered hydric because the criteria for depleted matrix was met. Indicators of wetland hydrology included water marks.

The adjacent upland was shrubby field. Dominant vegetation included red cedar (*Juniper virginiana*), Canada goldenrod (*Solidago canadensis*), and Queen Anne's lace (*Daucus carota*). There was no evidence of wetland hydrology. Soils were not considered hydric.

It is ASTI's opinion that Wetland A is not regulated by EGLE because it is less than five acres in size and isolated (located over 500 feet from any inland lakes, streams, or ponds).

Wetland B

Wetland B is a forested wetland (see Figure 1) 0.7 acres in size on-site. Dominant vegetation included common reed (*Phragmites australis*), green ash (*Fraxinus pennsylvanica*), silver maple (*Acer saccharinum*), and eastern cottonwood (*Populus deltoides*). Soils were considered hydric because the criteria for depleted below dark surface were met. Indicators of wetland hydrology included a high water table, saturation, and moss trim lines. This wetland continues off-site to the west and also has a culvert connection to linear wetlands located to the north of E. Long Lake Road.

The adjacent uplands included an old field that appears to have been historically developed or graded. Dominant vegetation included annual grasses, Canada thistle (*Cirsium arvense*), and Queen Anne's lace (*Daucus carota*). There was no evidence of wetland hydrology. Soils were not hydric.

It is ASTI's opinion that Wetland B is regulated by EGLE because it is greater than five acres in size, including off-site portions. This size is based off of aerial photograph interpretation.

Wetland C

Wetland C is a forested wetland (see Figure 1) 0.06 acres in size. Dominant vegetation included silver maple (*Acer saccharinum*), and bur oak (*Quercus macrocarpa*). Soils were considered hydric because the criteria for redox dark surface was met. Indicators of wetland hydrology included water stained leaves and Fac-Neutral test.

The adjacent uplands included an old field that appears to have been historically developed or graded. Dominant vegetation included annual grasses, Canada thistle (*Cirsium arvense*), and Queen Anne's lace (*Daucus carota*). There was no evidence of wetland hydrology. Soils were not hydric.

It is ASTI's opinion that Wetland C is not regulated by EGLE because it is less than five acres in size and isolated (located over 500 feet from any inland lakes, streams, or ponds).

Wetland P

Wetland P is an emergent wetland 0.06 acres in size (see Figure 1) dominated by common reed (*Phragmites australis*). Soils were considered hydric because the criteria for redox dark surface was met. Indicators of wetland hydrology included surface soil cracks and Fac-Neutral test. A non-functioning culvert left in place was observed in Wetland P.

The adjacent uplands included an old field that appears to have been historically developed or graded. Dominant vegetation included Siberian elm (*Ulmus pumila*), and common reed (*Phragmites australis*). There was no evidence of wetland hydrology. Soils were considered hydric the criteria for depleted below dark surface were met.

It is ASTI's opinion that Wetland P is not regulated by EGLE because it is less than five acres in size and isolated (located over 500 feet from any inland lakes, streams, or ponds).

Areas of Disturbance

Review of historic aerial photographs as far back as 1999 indicates that the majority of the Property has been developed and ground disturbed. During the wetland delineation activities, there were a number of isolated areas observed within old field that have been historically developed, structures razed, and ground graded. Dominant vegetation included common reed (*Phragmites australis*) and rushes (*Juncus torreyi, Juncus dudleyi*). These areas were determined to be upland due to a lack of a primary wetland hydrology indicator. Soil saturation, where present, was due to a restrictive layer (in this case gravel) within 12 inches of the ground surface, not a high water table. Per the USACE methodology, saturation due to a restrictive layer within 12 inches of the ground surface is not considered a primary hydrology indicator. Therefore, these areas were not identified as wetland.

Wetland Flagging

Wetland boundaries were GPS surveyed and marked in the field with day-glow pink and black striped flagging marked with the following flagging numbers:
Wetland A: A-1 through A-32
Wetland B: B-1 through B-43
Wetland C: C-1 through C-7
Wetland P: P-1 through P-8

SUMMARY

Based upon the data, criteria, and evidence noted above, it is ASTI's professional opinion that the Property includes one wetland, Wetland B, regulated by EGLE under the Natural Resources and Environmental Protection Act (1994 P.A. 451), Part 303 (Wetland Protection). In addition, three wetlands not likely regulated by EGLE were also found on the Property. Please note that EGLE has the final authority on the extent of regulated wetlands, lakes, and streams in the State of Michigan. Any proposed impact to the areas that ASTI has identified as regulated will require an EGLE permit.

Attached are Figure 1, which shows the GPS locations of wetland flagging on the Property, and completed US Army Corps of Engineers (ACOE) Wetland Data Forms. Please note that the data sheet numbers match the data collection sampling points shown on Figure 1.

Thank you for the opportunity to assist you with this project. Please let us know if we can be of any further assistance in moving your project forward.

Sincerely yours,

ASTI ENVIRONMENTAL

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

- ___ Surface Water (A1)
- ___ High Water Table (A2)
- ___ Saturation (A3)
- ___ Water Marks (B1)
- ___ Sediment Deposits (B2)
- ___ Drift Deposits (B3)
- ___ Algal Mat or Crust (B4)
- ___ Iron Deposits (B5)
- ___ Inundation Visible on Aerial Imagery (B7)
- ___ Sparsely Vegetated Concave Surface (B8)
- ___ Water-Stained Leaves (B9)
- ___ Aquatic Fauna (B13)
- ___ Marl Deposits (B15)
- ___ Hydrogen Sulfide Odor (C1)
- ___ Oxidized Rhizospheres on Living Roots (C3)
- ___ Presence of Reduced Iron (C4)
- ___ Recent Iron Reduction in Tilled Soils (C6)
- ___ Thin Muck Surface (C7)
- ___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

- ___ Surface Soil Cracks (B6)
- ___ Drainage Patterns (B10)
- ___ Moss Trim Lines (B16)
- ___ Dry-Season Water Table (C2)
- ___ Crayfish Burrows (C8)
- ___ Saturation Visible on Aerial Imagery (C9)
- ___ Stunted or Stressed Plants (D1)
- ___ Geomorphic Position (D2)
- ___ Shallow Aquitard (D3)
- ___ Microtopographic Relief (D4)
- ___ FAC-Neutral Test (D5)

Field Observations:

Surface Water Present?	Yes _____	No X	Depth (inches): _____
Water Table Present?	Yes _____	No X	Depth (inches): _____
Saturation Present? (includes capillary fringe)	Yes _____	No X	Depth (inches): _____

Wetland Hydrology Present? **Yes** _____ **No** _____

- ___ Mesic Spodic (TA6) (**MLRA 144A, 145, 149B**)
- ___ Red Parent Material (F21)
- ___ Very Shallow Dark Surface (F22)
- ___ Other (Explain in Remarks)

[3]Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Restrictive Layer (if observed):

Type: _____

Depth (inches): _____

Hydric Soil Present? **Yes** ____ **No** ____

Remarks:

This data form is revised from Northcentral and Northeast Regional Supplement Version 2.0 to include the NRCS Field Indicators of Hydric Soils, Version 7.0, 2015 Errata. (http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/nrcs142p2_051293.docx)

WETLAND DETERMINATION DATA FORM – Northcentral and Northeast Region

Project/Site: Goodman Property City/County: Oakland County Sampling Date: 3/24/21

Applicant/Owner: Robertson Brothers Homes State: MI Sampling Point: U2

Investigator(s): ASTI Environmental - B. Kassuba Section, Township, Range: Section 15, T02N, R11E

Landform (hillside, terrace, etc.): Local relief (concave, convex, none): none Slope %:

Subregion (LRR or MLRA): LRR L Lat: Long: Datum:

Soil Map Unit Name: Selfrdige loamy sand NWI classification:

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No (If no, explain in Remarks.)

Are Vegetation N, Soil Y, or Hydrology Y significantly disturbed? Are "Normal Circumstances" present? Yes No X

Are Vegetation N, Soil N, or Hydrology N naturally problematic? (If needed, explain any answers in Remarks.)

SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes X	No	**Is the Sampled Area**
Hydric Soil Present?	Yes	No X	**within a Wetland?** **Yes** **No** X
Wetland Hydrology Present?	Yes	No X	If yes, optional Wetland Site ID:

Remarks: (Explain alternative procedures here or in a separate report.)
This area and adjacent areas appear to have been historically developed and/or graded. Concrete rubble and gravel are prevalent. Soils are compacted or rutted as well. Surface soils were saturated at the time of inspection, but did not indicate hydrology because it does not appear to be associated with a high water table below the saturated zone, and there appears to be a restrictive layer of gravel within 12 inches of the surface.

Hydric Soil Indicators:

- ___ Histosol (A1)
- ___ Histic Epipedon (A2)
- ___ Black Histic (A3)
- ___ Hydrogen Sulfide (A4)
- ___ Stratified Layers (A5)
- X Depleted Below Dark Surface (A11)
- ___ Thick Dark Surface (A12)
- ___ Sandy Mucky Mineral (S1)
- ___ Sandy Gleyed Matrix (S4)
- ___ Sandy Redox (S5)
- ___ Stripped Matrix (S6)
- ___ Dark Surface (S7)
- ___ Polyvalue Below Surface (S8) (**LRR R, MLRA 149B**)
- ___ Thin Dark Surface (S9) (**LRR R, MLRA 149B**)
- ___ High Chroma Sands (S11) (**LRR K, L)**
- ___ Loamy Mucky Mineral (F1) (**LRR K, L**)
- ___ Loamy Gleyed Matrix (F2)
- ___ Depleted Matrix (F3)
- ___ Redox Dark Surface (F6)
- ___ Depleted Dark Surface (F7)
- ___ Redox Depressions (F8)
- ___ Marl (F10) (**LRR K, L**)

Indicators for Problematic Hydric Soils[3]:

- ___ 2 cm Muck (A10) (**LRR K, L, MLRA 149B**)
- ___ Coast Prairie Redox (A16) (**LRR K, L, R**)
- ___ 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
- ___ Polyvalue Below Surface (S8) (**LRR K, L**)
- ___ Thin Dark Surface (S9) (**LRR K, L**)
- ___ Iron-Manganese Masses (F12) (**LRR K, L, R**)
- ___ Piedmont Floodplain Soils (F19) (**MLRA 149B**)
- ___ Mesic Spodic (TA6) (**MLRA 144A, 145, 149B**)
- ___ Red Parent Material (F21)
- ___ Very Shallow Dark Surface (F22)
- ___ Other (Explain in Remarks)

[3]Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Restrictive Layer (if observed):

Type: _____

Depth (inches): _____

Hydric Soil Present? **Yes** X **No** ___

Remarks:

This data form is revised from Northcentral and Northeast Regional Supplement Version 2.0 to include the NRCS Field Indicators of Hydric Soils, Version 7.0, 2015 Errata. (http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/nrcs142p2_051293.docx)

WETLAND DETERMINATION DATA FORM – Northcentral and Northeast Region

Project/Site: Goodman Property City/County: Oakland County Sampling Date: 3/24/21

Applicant/Owner: Robertson Brothers Homes State: MI Sampling Point: W1

Investigator(s): ASTI Environmental - B. Kassuba Section, Township, Range: Section 15, T02N, R11E.

Landform (hillside, terrace, etc.): _____ Local relief (concave, convex, none): none Slope %: _____

Subregion (LRR or MLRA): LRR L Lat: _____ Long: _____ Datum: _____

Soil Map Unit Name: Urban land NWI classification: _____

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No _____ (If no, explain in Remarks.)

Are Vegetation N, Soil N, or Hydrology N significantly disturbed? Are "Normal Circumstances" present? Yes X No _____

Are Vegetation N, Soil N, or Hydrology N naturally problematic? (If needed, explain any answers in Remarks.)

SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes X	No _____	**Is the Sampled Area**
Hydric Soil Present?	Yes X	No _____	**within a Wetland?** **Yes** X **No** _____
Wetland Hydrology Present?	Yes X	No _____	If yes, optional Wetland Site ID: _____

Remarks: (Explain alternative procedures here or in a separate report.)

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

- ___ Surface Water (A1)
- ___ High Water Table (A2)
- ___ Saturation (A3)
- X Water Marks (B1)
- ___ Sediment Deposits (B2)
- ___ Drift Deposits (B3)
- ___ Algal Mat or Crust (B4)
- ___ Iron Deposits (B5)
- ___ Inundation Visible on Aerial Imagery (B7)
- ___ Sparsely Vegetated Concave Surface (B8)
- ___ Water-Stained Leaves (B9)
- ___ Aquatic Fauna (B13)
- ___ Marl Deposits (B15)
- ___ Hydrogen Sulfide Odor (C1)
- ___ Oxidized Rhizospheres on Living Roots (C3)
- ___ Presence of Reduced Iron (C4)
- ___ Recent Iron Reduction in Tilled Soils (C6)
- ___ Thin Muck Surface (C7)
- ___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

- ___ Surface Soil Cracks (B6)
- ___ Drainage Patterns (B10)
- ___ Moss Trim Lines (B16)
- ___ Dry-Season Water Table (C2)
- ___ Crayfish Burrows (C8)
- ___ Saturation Visible on Aerial Imagery (C9)
- ___ Stunted or Stressed Plants (D1)
- ___ Geomorphic Position (D2)
- ___ Shallow Aquitard (D3)
- ___ Microtopographic Relief (D4)
- X FAC-Neutral Test (D5)

Field Observations:

Surface Water Present?	Yes _____	No X	Depth (inches): _____
Water Table Present?	Yes _____	No X	Depth (inches): _____
Saturation Present? (includes capillary fringe)	Yes _____	No X	Depth (inches): _____

Wetland Hydrology Present? **Yes** X **No** _____

Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

VEGETATION – Use scientific names of plants. Sampling Point: W1

Dominance Test worksheet:

Number of Dominant Species That Are OBL, FACW, or FAC: 3 (A)

Total Number of Dominant Species Across All Strata: 3 (B)

Percent of Dominant Species That Are OBL, FACW, or FAC: 100.0% (A/B)

Prevalence Index worksheet:

Total % Cover of:		Multiply by:	
OBL species	0	x 1 =	0
FACW species	57	x 2 =	114
FAC species	20	x 3 =	60
FACU species	0	x 4 =	0
UPL species	0	x 5 =	0
Column Totals:	77 (A)		174 (B)

Prevalence Index = B/A = 2.26

Hydrophytic Vegetation Indicators:

___ 1 - Rapid Test for Hydrophytic Vegetation

X 2 - Dominance Test is >50%

X 3 - Prevalence Index is ≤3.0[1]

___ 4 - Morphological Adaptations[1] (Provide supporting data in Remarks or on a separate sheet)

___ Problematic Hydrophytic Vegetation[1] (Explain)

[1]Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic.

Definitions of Vegetation Strata:

Tree – Woody plants 3 in. (7.6 cm) or more in diameter at breast height (DBH), regardless of height.

Sapling/shrub – Woody plants less than 3 in. DBH and greater than or equal to 3.28 ft (1 m) tall.

Herb – All herbaceous (non-woody) plants, regardless of size, and woody plants less than 3.28 ft tall.

Woody vines – All woody vines greater than 3.28 ft in height.

Hydrophytic Vegetation Present? **Yes** X **No** ___

Remarks: (Include photo numbers here or on a separate sheet.)

SOIL

Sampling Point W1

MEMO

VIA EMAIL tloughrin@robertsonhomes.com

To:	**Mr. Tim Loughrin** **Director of Land Acquisition** **Robertson Brothers Homes**
From:	**Julie Kroll, PE, PTOE** **Trevor Boer** **Fleis & VandenBrink**
Date:	**June 22, 2022**
Re:	**The Village of Troy PUD** **City of Troy, Michigan** **Traffic Impact Study**

1 INTRODUCTION

This memorandum presents the results of the Traffic Impact Study (TIS) for the proposed Village of Troy PUD. The proposed residential development is located generally in the southeast quadrant of the Long Lake Road and Rochester Road intersection in Troy, Michigan. The project includes the construction of single-family detached homes and single-family attached (townhomes/duplex) residential homes, with site access provided via two (2) driveways; one (1) driveway on Long Lake Road and one (1) driveway on Rochester Road. Long Lake Road is under the jurisdiction of the Road Commission for Oakland County (RCOC) and Rochester Road is under the jurisdiction of the City of Troy. The City of Troy has required the completion of Traffic Impact Study for the development as part of the PUD site plan approval process.

The scope of work for this study was developed based on the requirements of the City of Troy, Fleis & VandenBrink's (F&V) knowledge of the study area, understanding of the development program, accepted traffic engineering practices, and information published by the Institute of Transportation Engineers (ITE). The study analyses were completed using Synchro/SimTraffic (Version 11). Sources of data for this study include F&V subconsultant Gewalt Hamilton Associates, SEMCOG, MDOT, and ITE.

2 BACKGROUND

2.1 EXISTING ROAD NETWORK

The lane uses and traffic control at the study intersections are shown on the attached **Figure 2,** and the study roadways are summarized in **Table 1** and are further described herein. For the purposes of this study, all minor streets, crossovers, and site driveways are assumed to have an operating speed of 25 miles per hour (mph), unless otherwise noted.

27725 Stansbury Boulevard, Suite 195
Farmington Hills, MI 48334
P: 248.536.0080
F: 248.536.0079
www.fveng.com

Table 1: Roadway Information

Roadway Segment	Long Lake Road	Rochester Road	Glaser Drive
Number of Lanes	4 Lanes (divided boulevard)	5 Lanes (2 lanes each direction + TWLTL)	2 Lanes (1 lane each direction)
Functional Classification	Other Principal Arterial	Other Principal Arterial	Local Road
Roadway Jurisdiction	RCOC	City of Troy	City of Troy
Speed Limit	45 mph	45 mph	25 mph
Traffic Volumes (SEMCOG)	26,695 vpd (2019)	23,209 vpd (2019)	N/A

Long Lake Road generally runs in the east and west directions, north of the project sight, with a posted speed limit of 45 mph. Long Lake Road has an Annual Average Daily Traffic (AADT) volume of approximately 26,695 vehicles per day (SEMCOG 2019); 12,713 vpd EB and 13,982 vpd WB. The roadway has a four-lane, median divided cross-section, with the with two (2) lanes eastbound and two (2) lanes westbound. At the intersection with Rochester Road, Long Lake Road widens to have exclusive right-turn lanes; left-turns are facilitated via median U-turns. Long Lake Road is under the jurisdiction of the RCOC and has a functional classification of an *Other Principal Arterial.*

Rochester Road generally runs in the north and south directions, east of the project site, with a posted speed limit of 45 mph. Rochester Road has an Annual Average Daily Traffic (AADT) volume of approximately 22,342 vehicles per day (SEMCOG 2019) northbound and approximately 23,209 vehicles per day (SEMCOG 2019) southbound. The roadway has five (5) lanes, with the with two (2) lanes northbound, two (2) lanes southbound, and a two-way left-turn lane (TWLTL). At the intersection with Rochester Road, Long Lake Road widens to have exclusive right-turn lanes; left-turns are facilitated via median U-turns. Rochester Road is under the jurisdiction of the City of Troy and has a functional classification of *Other Principal Arterial*.

Glaser Drive generally runs in the east and west directions, adjacent to the east side of the project site. The roadway is classified as *Local Road* and is under the jurisdiction of the City of Troy. Glaser Drive does not have a posted speed limit; therefore, a premia facia residential street speed limit of 25 mph was assumed for this roadway. The roadway geometry is a typical two-lane cross section with one lane in each direction. Additionally, the eastbound approach at Rochester Road permits right-turn only movements.

2.2 EXISTING TRAFFIC VOLUMES

Due to the impacts of COVID-19, current traffic volume data is not representative of "typical" operations. Therefore, the traffic volume data necessary for this study were obtained from multiple sources:

- Sydney Coordinated Automated Traffic System (SCATS) volume data was obtained along Long Lake Road and Rochester Road from RCOC for use in this study. The SCATS data utilized for this study was obtained on Wednesday, March 30th, 2018, and Wednesday, June 5th, 2019 prior to the traffic impacts of COVID-19.
- F&V subconsultant Traffic Data Collection, Inc. (TDC) performed weekday AM (7:00 AM to 9:00 AM) and PM (4:00 PM to 6:00 PM) peak hour turning movement counts on Wednesday, June 1st, 2022, at the study intersections.

The mainline traffic volumes at the 2022 intersections were compared with historical volumes and the SCATS mainline volumes at the signalized intersection of Rochester Road & Long Lake Road; then COVID-19 adjustment factors were determined for each of the study intersection's approaches as shown in **Table 2**. The results of the comparison showed that only the AM peak hour currently has traffic volumes lower than expected. The PM peak hour and during both the AM and PM southbound approach, traffic volumes are higher than expected, therefore no COVID adjustments were applied for these approaches.

Table 2: COVID Adjustment Factors

Rochester Road & Long Lake Road				
Peak Period	EB	WB	NB	SB
AM	33%	39%	24%	N/A
PM	N/A	N/A	N/A	N/A

The COVID-19 adjustment factors and growth rates were applied in order to calculate the baseline 'existing' 2022 traffic volumes, as shown on the attached **Figure 3**. The traffic volumes were then balanced upwards through the study network. Dummy nodes were utilized where necessary to account for sink-and-source between intersections.

The peak periods for the adjacent streets were observed to generally occur between 7:30AM to 8:30 AM and 4:45 PM to 5:45 PM. F&V collected an inventory of existing lane use and traffic controls, as shown on the attached **Figure 2**; additionally, F&V obtained the signal timing permits from RCOC. All applicable background data referenced in this memorandum are attached.

3 EXISTING CONDITIONS

Existing peak hour vehicle delays and Levels of Service (LOS) were calculated at the study intersections using Synchro/SimTraffic (Version 11) traffic analysis software. This analysis was based on the existing lane use and traffic control shown on the attached **Figure 2**, the existing peak hour traffic volumes shown on the attached **Figure 3**, and the methodologies presented in the Highway Capacity Manual, 6th Edition (HCM6). The lane use and traffic control used at of the study intersection of Rochester Road and Long Lake Road includes non-NEMA phasing and clustered intersections, which are not supported by the HCM 6th Edition (HCM6) analysis methodology; therefore, HCM 2000 was determined to be more appropriate for use at signalized intersections.

Descriptions of LOS "A" through "F" as defined in the HCM, are attached for signalized and unsignalized intersections. Typically, LOS D is considered acceptable, with LOS A representing minimal delay, and LOS F indicating failing conditions. Microsimulations were also conducted at the study intersections using SimTraffic to further evaluate the network performance and vehicle queueing. The results of the analysis of existing conditions are attached and are summarized in **Table 3**.

Table 3: Existing Intersection Operations

Intersection		Control	Approach	Existing Conditions			
				AM Peak		PM Peak	
				Delay (s/veh)	LOS	Delay (s/veh)	LOS
1	Rochester Road & Glaser Drive	Stop (Minor)	EBR	19.2	B	12.8	B
			WB	$	F	$	F
			NBL	13.7	B	10.0	A
			SBL	14.6	B	21.0	C
2	Rochester Road & Long Lake Road	Signalized	EBT	17.2	B	42.1	D
			EBR	15.8	B	15.3	B
			WBT	83.0	F	28.3	C
			WBR	25.5	C	26.0	C
			NBT	31.9	C	45.4	D
			NBR	21.0	C	27.0	C
			SBT	69.8	E	27.3	C
			SBR	21.2	C	19.8	B
			Overall	**52.1**	**E**	**30.4**	**C**
3	WB to EB Long Lake Road X/O West of Rochester Road	Signalized	EB	23.0	C	24.4	C
			SBL	36.9	D	35.2	D
			Overall	**26.6**	**C**	**26.2**	**C**

$ Delay Exceeds 300 Seconds

The results of the existing conditions analysis indicates that all approaches and movements at the study intersections are currently operating acceptably (at LOS D or better) during both peak periods with the following exceptions:

Rochester Road & Long Lake Road

- During AM peak hour: The intersection is currently operating at LOS E. The southbound and westbound through movements are currently operating at LOS E and LOS F, respectively.
- The high volumes of southbound and westbound through traffic are both in need of signal split time to accommodate the directional traffic volumes. Since the movements are conflicting, the signal splits are essentially equal, and neither southbound nor westbound approaches operate well.
- The City and RCOC should continue to monitor the intersection operations as traffic volumes recover post-COVID to determine if regional improvements on Rochester Road and Long Lake Road should be considered to improve the intersection operations.

Rochester Road & Glaser Drive

- During AM and PM peak hour: The westbound approach is currently operating at LOS F.
- The westbound approach has very low traffic volumes (6 AM and 23 PM). Although a poor LOS was calculated by the HCM analysis, a review of SimTraffic network simulations indicates vehicles are able to find adequate gaps within the through traffic along Rochester Road without experiencing significant delays or excessive vehicle queueing.

4 BACKGROUND CONDITIONS (2027)

Historical population and economic profile data was obtained for the City of Troy from the Southeast Michigan Council of Governments (SEMCOG) to calculate a background growth rate for the 2022 traffic volumes in order to calculate the 2027 site buildout year traffic volumes. Population and employment projections from 2020 to 2045 were reviewed and show an average annual growth of -0.15% and 0.30%, respectively. Therefore, a conservative background growth rate of **0.50%** per year was applied to the adjusted existing peak hour traffic volumes to forecast the background 2027 traffic volume ***without the proposed development***.

Background peak hour vehicles delays and LOS ***without the proposed development*** were calculated at the study intersections based on the existing lane use and traffic control shown on the attached **Figure 2**, the background traffic volumes shown on the attached **Figure 4**, and the methodologies presented in the HCM6. The results of the background conditions analysis are attached and summarized in **Table 4**.

Table 4: Background Intersection Operations

Intersection		Control	Approach	Existing Conditions				Background Conditions				Difference			
				AM Peak		PM Peak		AM Peak		PM Peak		AM Peak		PM Peak	
				Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS

Intersection		Control	Approach	Existing Conditions				Background Conditions				Difference			
				AM Peak		PM Peak		AM Peak		PM Peak		AM Peak		PM Peak	
				Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS
3	WB to EB Long Lake Road X/O West of	Signalized	EB	23.0	C	24.4	C	23.1	C	24.9	C	0.1	-	0.5	-
			SBL	36.9	D	35.2	D	34.6	D	35.0	D	-2.3	-	-0.2	-
			Overall	**26.6**	**C**	**26.2**	**C**	**26.2**	**C**	**26.6**	**C**	**-0.4**	**-**	**0.4**	**-**

$ Delay Exceeds 300 Seconds

The results of the background conditions analysis indicates that all of the study intersection's approaches and movements will continue to operate in a manner similar to existing conditions analysis. *Note: Several of the intersection movements improved with the addition of background traffic. This is due to the optimization of signal splits with the SCATS operations and increased lane utilization which decreased the delay for certain movements.*

5 SITE TRIP GENERATION

The proposed development includes the construction of 20 single-family detached homes and 126 single-family attached homes. The number of weekday peak hour (AM and PM) and daily vehicle trips that would be generated by the proposed development were calculated using the equations published by the Institute of Transportation Engineers (ITE) in *Trip Generation, 11th Edition*. The site trip generation forecast utilized for the proposed development is summarized in **Table 5**.

Table 4: Site Trip Generation Summary

Land Use	ITE Code	Size	Unit	Weekday Average Daily Traffic (vpd)	AM Peak Hour (vph)			PM Peak Hour (vph)		
					In	Out	Total	In	Out	Total
Single-Family Detached	210	20	DU	230	4	13	17	14	8	22
Single-Family Attached Housing	215	126	DU	910	19	41	60	41	31	72
Total		**146**	**DU**	**1,140**	**23**	**54**	**77**	**55**	**39**	**94**

6 SITE TRIP DISTRIBUTION

The vehicular trips that would be generated by the proposed development were assigned to the study roads based on the proposed site access plan, the existing peak hour traffic patterns on the adjacent roadway network, and the methodologies published by ITE. The adjacent street traffic volumes were used to develop the trip distribution. To determine the projected site traffic distribution, it was assumed that the existing adjacent street traffic volumes in the AM are home-to-work based trips, and in the PM are work-to-home based trips. Therefore, the trip distribution assumes trips are leaving the proposed development and exiting the study network in the AM, then entering the network to return to the proposed development in the PM. The site trip distribution used in the analysis is summarized in **Table 6**.

Table 5: Site Trip Distribution

To/From	via	AM	PM
North	Rochester Road	24%	26%
South	Rochester Road	41%	37%
East	Long Lake Road	13%	15%
West	Long Lake Road	22%	22%
	Total	**100%**	**100%**

7 FUTURE CONDITIONS

Future peak hour vehicle delays and LOS ***with the proposed development*** were calculated based on the future lane use shown on the attached **Figure 2**, future traffic volumes shown on the attached **Figure 6**, and the methodologies presented in the HCM6. The results of the future conditions analysis are summarized in **Table 7.** Table 6: Future Intersection Operations

Intersection		Control	Approach	Background Conditions				Future Conditions				Difference			
				AM Peak		PM Peak		AM Peak		PM Peak		AM Peak		PM Peak	
				Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS	Delay (s/veh)	LOS

$ Delay Exceeds 300 Seconds

The results of the future conditions analysis indicates that all of the study intersection approaches and movements will continue to operate in a manner similar to existing background conditions analysis. *Note: Several of the intersection movements improved with the addition of future traffic. This is due to the optimization of signal splits and increased lane utilization which decreased the delay on certain movements.*

Rochester Road & Long Lake Road

- <u>During AM peak hour:</u> The intersection is expected to continue operating at LOS E, with the southbound and westbound through movements continuing to operate at LOS E and LOS F, respectively. However, the increase in delay at this intersection due to site generated traffic is negligible (1-2 seconds).
- The high volumes of southbound and westbound through traffic are both in need of signal split time to accommodate the directional traffic volumes. Since the movements are conflicting, the signal splits are essentially equal, and neither southbound nor westbound approaches operate well.
- The City and RCOC should continue to monitor the intersection operations as traffic volumes recover post-COVID to determine if regional improvements on Rochester Road and Long Lake Road should be considered to improve the intersection operations.

Rochester Road & Glaser Drive

- During AM and PM peak hour: The westbound approach is expected to continue operating at LOS F.
- The westbound approach has very low traffic volumes (6 AM and 23 PM). Although a poor LOS was calculated by the HCM analysis, a review of SimTraffic network simulations indicates vehicles are able to find adequate gaps within the through traffic along Rochester Road without experiencing significant delays or excessive vehicle queueing.

Long Lake Road & Site Drive

- The proposed site driveway on Long Lake Road provides full access for the development. The ingress left turns were reviewed to determine the projected queue length and the potential impacts to the adjacent street.
- The SimTraffic network simulations show a 95th percentile queue length of 42 feet (~2 cars) for ingress left turns at the proposed site driveway on Long Lake Road. Therefore, the existing center left-turn lane provides adequate length to store the expected queues.

8 AUXILIARY TURN LANE EVALUATION

Rochester Road and Long Lake Road both have two-way center left-turn lanes at the proposed site drives. Additionally, there is an existing right-turn lane on Rochester Road at Glaser Drive; therefore, only the right-turn treatment criteria was evaluated at the proposed site driveway on Long Lake Road. The results of the analysis are summarized in **Table 8** below, and the RCOC auxiliary lane warrant charts are attached.

Table 7: Turn Lane Warrant Analysis Summary

Intersection	Right-Treatment
Long Lake Road & Site Drive	**Right-Turn Taper**

9 CONCLUSIONS

The conclusions of this TIS are as follows:

1. Existing Conditions (2022)

The results of the existing conditions analysis indicates that all approaches and movements at the study intersections are currently operating acceptably, at LOS D or better, during both peak periods with following exceptions:

Rochester Road & Long Lake Road

- During AM peak hour: The intersection is currently operating at LOS E. The southbound and westbound through movements are currently operating at LOS E and LOS F, respectively. The high volumes of southbound and westbound through traffic are both in need of signal split time to accommodate the directional traffic volumes. Since the movements are conflicting, the signal splits are essentially equal, and neither southbound nor westbound approaches operate well.
- The City and RCOC should continue to monitor the intersection operations as traffic volumes recover post-COVID to determine if regional improvements on Rochester Road and Long Lake Road should be considered to improve the intersection operations.

Rochester Road & Glaser Drive

During AM and PM peak hour: The westbound approach is currently operating at LOS F. The westbound approach has very low traffic volumes (6 AM and 23 PM). Although a poor LOS was calculated by the HCM analysis, a review of SimTraffic network simulations indicates vehicles are able to find adequate gaps within the through traffic along Rochester Road without experiencing significant delays or excessive vehicle queueing.

2. Background Conditions (2023):

- A conservative 0.5% annual background growth rate was utilized in order to project the existing traffic volumes to the buildout year of 2027.
- The results of the background conditions analysis indicates that all approaches and movements at the study intersections will continue to operate in a manner similar to existing conditions.

3. Future Conditions (2023)

The results of the background conditions analysis indicates that all approaches and movements at the study intersections will continue to operate in a manner similar to existing conditions.

Rochester Road & Long Lake Road

- During AM peak hour: The intersection is expected to continue operating at LOS E, with the southbound and westbound through movements continuing to operate at LOS E and LOS F, respectively. However, the increase in delay at this intersection due to site generated traffic is negligible (1-2 seconds).
- The City and RCOC should continue to monitor the intersection operations as traffic volumes recover post-COVID to determine if regional improvements on Rochester Road and Long Lake Road should be considered to improve the intersection operations.

Rochester Road & Glaser Drive

- During AM and PM peak hour: The westbound approach is expected to continue operating at LOS F.
- The westbound approach has very low traffic volumes (6 AM and 23 PM). Although a poor LOS was calculated by the HCM analysis, a review of SimTraffic network simulations indicates vehicles can find adequate gaps within the through traffic along Rochester Road without experiencing significant delays or excessive vehicle queueing.

Long Lake Road & Site Drive

- The proposed site driveway on Long Lake Road provides full access for the development. The ingress left turns were reviewed to determine the projected queue length and the potential impacts to the adjacent street.
- The SimTraffic network simulations show a 95th percentile queue length of 42 feet (~2 cars) for ingress left turns at the proposed site driveway on Long Lake Road. Therefore, the existing center left-turn lane can accommodate the projected vehicle queues.

4. Auxiliary Turn Lane Evaluation

- Rochester Road and Long Lake Road both have two-way center left-turn lanes at the proposed site drives. Additionally, there is an existing right-turn lane on Rochester Road at the Glaser Drive; therefore, only the right turn treatment criteria was evaluated at the proposed site driveway on Long Lake Road.
- The results of the analysis show that a right-turn deceleration taper is recommended on EB Long Lake Road at the proposed Site Drive.

10 RECOMMENDATIONS

The recommendation of this TIS are as follows:

- The City and RCOC should continue to monitor the intersection operations as traffic volumes recover post-COVID to determine if regional improvements on Rochester Road and Long Lake Road should be considered to improve the intersection operations.
- Provide a right-turn deceleration taper on EB Long Lake Road at the proposed W. Site Drive.

Any questions related to this memorandum, study, analysis, and results should be addressed to Fleis & VandenBrink.

Level of Service Criteria for Stop Sign Controlled Intersections

The level of service criteria are given in Exhibit 20-2. As used here, control delay is defined as the total elapsed time from the time a vehicle stops at the end of the queue until the vehicle departs from the stop line; this time includes the time required for the vehicle to travel from the last-in-queue position to the first-in-queue position, including deceleration of vehicles from free-flow speed to the speed of vehicles in queue.

The average total delay for any particular controlled movement is a function three (capacity) factors: distribution of gaps in the major-street traffic stream, driver judgment in selecting gaps through which to execute the desired maneuvers, and the follow-up headways required by each driver in a queue.

The basic capacity model assumes gaps in the conflicting movements are randomly distributed. When traffic signals are present on the major street, upstream of the subject intersection, flows may not be random but will likely have some platoon structure. Although the procedures in this chapter provide a method for approximating the operations of a TWSC intersection with an upstream signal, the operations of such an intersection is arguably best handled by including it in a complete simulation

Exhibit 20-2. Level of Service Criteria for Stop-Controlled Intersections (Motor Vehciles)

LEVEL OF SERVICE	AVERAGE CONTROL DELAY (sec/veh)
A	$\leq$ 10
B	> 10 and $\leq$ 15
C	> 15 and $\leq$ 25
D	> 25 and $\leq$ 35
E	> 35 and $\leq$ 50
F	> 50

Average total delay less than 10 sec/veh is defined as Level of Service (LOS) A. Follow-up times of less than 5 sec have been measured when there is no conflicting traffic for a minor street movement, so control delays of less than 10 sec/veh are appropriate for low flow conditions. A total delay of 50 sec/veh is assumed as the break point between LOS E and F.

The LOS criteria for TWSC intersections differ somewhat from the criteria used in Chapter 19 for signalized intersections, primarily because user perceptions differ among transportation facility types. The expectation is that a signalized intersection is designed to carry higher traffic volumes and will present greater delay than an unsignalized intersection. Additionally, several driver behavior considerations combine to make delays at signalized intersections less onerous than at unsignalized intersections. For example, drivers at signalized intersections are able to relax during the red interval, where drivers on the minor approaches to unsignalized intersections must remain attentive to the task of identifying acceptable gaps and vehicle conflicts. Also, there is often much more variability in the amount of delay experienced by individual drivers at unsignalized than signalized intersections. For these reasons, it is considered that the total delay threshold for any given level of service is less for an unsignalized intersection than for a signalized intersection.

LOS F exists when there are insufficient gaps of suitable size to allow a side street demand to cross safely through a major street traffic stream. This level of service is generally evident from extremely long total delays experienced by side street traffic and by queueing on the minor approaches. The method, however, is based on a constant critical gap size - that is, the critical gap remains constant, no matter how long the side street motorist waits. LOS F may also appear in the form of side street vehicles' selecting smaller-than-usual gaps. In such cases, safety may be a problem and some disruption to the major traffic stream may result. It is important to note that LOS F may not always result in long queues but may result in adjustments to normal gap acceptance behavior. The latter is more difficult to observe on the field than queueing, which is more obvious.

Source: Highway Capacity Manual, 6th Edition. Transportation Research Board, National Research Council

Level of Service for Signalized Intersections

Level of service for signalized intersections is defined in terms of delay, which is a measure of driver discomfort and frustration, fuel consumption, and lost travel time. LOS can be characterized for the entire intersection, each intersection approach, and each lane group. Specifically, level-of-service (LOS) criteria are stated in terms of the average stopped delay per vehicle. The criteria are given in Exhibit 19-8. Delay may be measured in the field or estimated using procedures presented later in this chapter. Delay is a complex measure and is dependent on a number of variables, including the quality of progression, the cycle length, the green ratio, and the v/c ratio for the lane group in question.

LOS A describes operations with a control delay of 10 s/veh or less. This level is typically assigned when the volume-to-capacity ratio is low and either progression is extremely favorable or the cycle length is very short. If LOS A is the result of favorable progression, most vehicles arrive during a green indication and travel through the intersection without stopping.

LOS B describes operations with control delay between 10 and 20 s/veh. This level is typically assigned when the volume-to-capacity ratio is low and either progression is highly favorable or the cycle length is short. More vehicles stop than with LOS A.

Exhibit 19.8. Level-of-Service Criteria for Signalized Intersections (Motorized Vehicles)

LEVEL OF SERVICE	STOPPED DELAY PER VEHICLE (SEC)
A	≤10.0
B	> 10.0 and ≤20.0
C	> 20.0 and ≤ 35.0
D	> 35.0 and ≤ 55.0
E	> 55.0 and ≤ 80.0
F	>80.0

1. If the v/c ratio for a lane group exceeds 1.0, a LOS F is assigned to the individual lane group. LOS for approach-based and intersection-wide assessments are determined solely by the control delay.

LOS C describes operations with control delay between 20 and 35 s/veh. This level is typically assigned when progression is favorable or the cycle length is moderate. Individual *cycle failures* (i.e. one or more queued vehicles are not able to depart as a result of insufficient capacity during the cycle) may begin to appear at this level. The number if vehicle stopping is significant, although many vehicles still pass through the intersection without stopping.

LOS D describes operations with control delay between 35 and 55 s/veh. This level is typically assigned when when the volume-to-capacity ratio is high and either progression is ineffective or the cycle length is long. Many vehicles stop and individual cycle failures are noticeable.

LOS E describes operations with control delay between 55 and 80 s/veh. This level is typically assigned when when the volume-to-capacity ratio is high, progression is unfavorable, and the cycle length is long. Individual cycle failures are frequent.

LOS F describes operations with control delay exceeding 80 s/veh or a volume-to-capacity ratio greater than 1.0. This level, considered to be unacceptable to most drivers, often occurs with over-saturation, that is, when arrival flow rates exceed the capacity of the intersection. This level is typically assigned when the volume-to-capacity ratio is high, progression is very poor, and the cycle length is long. Most cycles fail to clear the queue.

Re: Village of Troy PUD
Traffic Impact Study Review

We have reviewed the traffic impact study for the proposed Village of Troy PUD. The proposed residential development located is generally in the southeast quadrant of the Long Lake Road and Rochester Road intersection in Troy, Michigan. The proposed site includes 20 single-family residential homes, 56 two-story townhomes, and 70 three-story townhomes, for a combined total of 146 dwelling units. There are two proposed access points, one on Long Lake Road and one on Rochester Road.

The traffic impact study was prepared by Fleis & VandenBrink Engineering, Inc., and it is dated June 22, 2022. Synchro traffic modeling files were also provided as part of the TIS documents for review.

OHM recommends approval of the traffic impact study and its recommendations, subject to providing additional information as noted below.

a) The proposed left turn lane and associated changes on Long Lake Rd must be approved by RCOC and OHM defers to RCOC for approval.

b) Crash Analysis: OHM recommends that the TIS should include crash analysis of Rochester at Glaser Dr and recommendations to improve safety if any are deemed appropriate.

RE: Proposed Village of Troy Planned Unit Development
Traffic Impact Study (TIS) Review
Troy, Michigan

Dear Mr. Loughrin:

Fleis & VandenBrink (F&V) staff has completed this letter in response to comments provided by OHM Advisors on behalf of the City of Troy in correspondence dated July 19, 2022. The comments provided by OHM regarding the traffic impact study performed by F&V in the report dated June 22, 2022, are summarized herein.

OHM Comment A: *The proposed left turn lane and associated changes on Long Lake Rd must be approved by RCOC, and OHM defers to RCOC for approval.*

F&V Response: Noted.

OHM Comment B*: Crash Analysis: OHM recommends that the TIS should include crash analysis of Rochester at Glaser Dr and recommendations to improve safety if any are deemed appropriate.*

F&V Response:

A crash analysis was conducted at the intersection of Rochester Road & Glaser Drive. F&V obtained historical crash data for the most recent available five years (January 1, 2017, to December 31, 2021) from Michigan Traffic Crash Facts (MTCF). It should be noted that animal crashes were excluded from this analysis. The crashes are summarized by crash type in **Table 1** and summarized by injuries in **Table 2**.

Table 1: Crash Type Summary

Location	Crash Type					Total
	Single Motor Vehicle Crash	Head-On Left-Turn	Angle	Rear End	Sideswipe-Same	
Rochester Road & Glaser Drive	1	1	1	2	2	**7**

27725 Stansbury Boulevard, Suite 195
Farmington Hills, MI 48334
P: 248.536.0080
F: 248.536.0079
www.fveng.com

Table 2: Worst Injury in Crash Summary

Location	Fatality	Type "A" Injury	Type "B" Injury	Type "C" Injury	Total
Rochester Road & Glaser Drive	0	0	0	3	**3**

The SEMCOG Crash Analysis Process 2016 *Regional Critical Intersection Crash Rates, Frequencies and Casualty Ratios: By Presence or Absence of Signalization* was used to compare the actual crash rates and crash frequencies to the regional crash rates and crash frequencies for similar intersections within the SEMCOG region. The results of the analysis are summarized in **Table 3.**

Table 3: SEMCOG Crash Analysis Summary

Intersection	Average ADT (Entering Volume vpd)	Total (5 years)	Crash Frequency (crashes/year)			Crash Rate (crashes per MV)		
			Intersection Annual Crash Frequency	SEMCOG Average Annual Crash Frequency	Difference	Intersection Crash Rate	SEMCOG Average Crash Rate	Difference
Rochester Road & Glaser Drive	34,655	**7.0**	1.40	3.44	-2.04	0.11	0.27	-0.16

The results of the analysis indicate the study intersection of Rochester Road & Glaser Drive has a crash frequency (crashes per year) and a crash rate (crashes per million vehicles) below the average for similar intersections within the SEMCOG region. The study intersection was further analyzed, and in-depth analysis is provided and summarized below.

There were seven (7) crashes reported at or associated with the intersection of Rochester Road & Glaser Drive between 2016 through 2021. However, it should be noted only 3 crashes were attributed to the intersection of Glaser Road & Rochester Road. The majority of the crashes recorded for this intersection are resulting from the adjacent McDonalds driveway or the adjacent signalized intersection. The most common crash types identified for this intersection were rear-end (28%) crashes and sideswipe-same (28%) crashes. The rear-end crashes were the result of vehicles failing to stop in assured clear distance and the sideswipe crashes were the result of unsafe observation and lane changes. Additionally, there were three (3) Type-C injuries (3); with no fatalities (Type-K) or severe injuries (Type-A).

The results of the crash analysis indicates that the intersection of Rochester Road & Glaser Drive has a crash frequency and a crash rate well below the SEMCOG average. Additionally, a review of the detailed crash reports (UD-10) indicates there is no identifiable crash patterns present for this study intersection. Therefore, no safety improvement mitigation measures are recommended for the study intersection of Rochester Road & Glaser Drive.

If you have any questions or concerns, please contact our office.

Sincerely,

FLEIS & VANDENBRINK ENGINEERING, INC.

Jackie,

Thanks for providing the information. I am concerned about this building plan's impact on my property and my neighborhood is also concerned in a similar manner.

1) New home's backyard will face my home's front yard area, Back yard area are a loud area for outside play, This is not acceptable and decrease our property value. Houses on opposite sides of the road should not face other people's back yard. I request to be fixed on the proposed planning with the front yards facing each other.

2) Current tree line is not on the map, it's part of each property sold and no guarantee they will be there. Boundry line between "River bend court" and "Village of Troy" property line. Confirmation in writing is required from the builder to the new homeowner to keep the tree line in place all the time.

3) 108 mixed home housing planned by the builder with an entry point at Long Lake road. Even "River bank" road is with no outlet and a lot of traffic by mistake to entry. During property sale activity and even after that time, As the map updates will not be available to the public. Concern with around 17 years old River bank street get damage and required unplanned repair.

- What Troy city can support us for this type of passive damage by this housing approval? Troy city to repair the street just like another city street?

4) " Village of Troy" zoning review date and time are not clear from online information. Please share this confirmation to join virtually or in person.

Thanks
