Manufacturer's Recommendations

U P M Patching - 3 Easy Steps

1. PREPARE

Remove all loose dust, dirt and debris by sweeping with a broom and scraping with a shovel.

2. APPLY

Shovel U P M into the hole and level out 25% higher than desired depth to allow for compaction. If patch is deeper than 3", apply and compact in separate 2" layers. Apply only over solid base, not mud or clay.

3. COMPACT

Compact U P M by driving truck back and forth over patch several times. Rollers and vibratory compactors generally improve all patch performance. Use them if available.

U P M Stockpiling

Place U P M on a clean pad of asphalt or concrete. Do not allow U P M to be contaminated with other materials. Dusty conditions will shorten U P M's stockpile life and lessen workability.

For in-depth technical information, contact your U P M Sales Representative or please call us directly at Unique Paving Materials Corporation (800) 441-4881
